IN THE YEAR 21XX...

With the discovery of the buried laboratory of famed robotics scientist Dr. Thomas Light and his final creations, a new type of robot dubbed "X", has been born. Able to think and feel on a human level, composed of mutable micro-technology very similar to human DNA, and possessing true free will, the Reploid race now covers the globe, working alongside mankind.

But with power and free will comes responsibility, and there are some that would use this power for evil ends. To combat these "Maverick" Reploids, an elite unit of Hunters was formed, to contain and—if necessary—destroy Maverick Reploids.

Over the past century, an unlikely duo has saved the world from devastation at the hands of Mavericks again and again. Among the hunters is X (the first Reploid) whose dreams of peace drive him to fight for those who are oppressed, and Zero, who has long since abandoned the dark designs of his creator Dr. Wily (Dr. Light's long-time rival) and befriended the very robot he was created to destroy.

IT IS THE YEAR 22XX...

MESSAGE HEADER: GIGA CITY RIOTS BRIEFING

MESSAGE ID: 357429MH4992376C

ATTN: MAVERICK HUNTER COMMANDER SIGNAS

FROM: CHIEF DISPATCHER ALIA

As requested, I am providing a brief history of Giga City and its current situation for our archival files.

Several years ago, a meteorite landed in the Pacific Ocean. Scientists reported highly unusual energy readings from the impact site, and investigative teams discovered that the meteorite contained a form of energy-producing metal ore not found on Earth.

Dubbed "Force Metal", this mineral, when refined and installed within Reploids, reacts with their DNA and causes changes in their innate abilities. Force Metal ores are amazingly diverse, and the refinement process produces a wide variety of effects within Reploids, with no indication of there being a limit to the number of variations. In order to properly mine, process, and research this new energy source and its effects on Reploids, the artificial island Giga City was built over the crash site.

Naturally, a power source such as this is a target for Mavericks who crave power for destruction. Thankfully, Giga City's security division had kept criminal activity and at a minimum, and had fended off outside invasions.

It appears that the true threat came from within, however. The Lagrano Laboratory carried out numerous experiments on Force Metal's effects on specially developed Reploids. One of the units designed for high-level testing (designated "Epsilon") ultimately proved as unstable as he was powerful, and began to instigate riots within Giga City.

Security forces underestimated the extent of Epsilon's abilities and vision,

OUR FUSION KICKER

and his powers of persuasion. Epsilon recruited numerous experimental and high-ranking Reploids to his cause, among them Ferham, chief of security for the Force Metal Research Facility. Giga City officials were caught completely unaware when a powerful and expertly directed militia dubbed the "Rebellion" rose against Giga City and overtook numerous key facilities. All humans were banished from Giga City, amazingly without harm, and Epsilon demanded the city be recognized as an independent state. The Federation has determined Epsilon to be Maverick, and has begun measure to wrest control of Giga City and the Force Metal from this unstable individual.

IN THE LINE OF DUTY

Commander Redips of the Maverick Hunters' Eastern division has requested assistance, as the forces under his command have so far been unable to infiltrate Giga City. All units sent in have either been destroyed or turned into Rebellion sympathizers. The small amount of intelligence obtained about Giga City indicates that Chief R, its former governor-general, has been taken prisoner, and what little remains of his Resistance is scattered and ill-equipped.

Though our own personnel are stretched thin currently, by your order we are dispatching our top two S-Ranked Hunters to infiltrate Giga City: X (former commander of Unit 17) and Zero (commander of Elite Unit). They are being accompanied by Shadow, whose assignments to Giga City previous to the Rebellion takeover should prove valuable to their field operations. Hopefully, they will be able to gain a foothold into Giga City, and begin the process of restoring order.

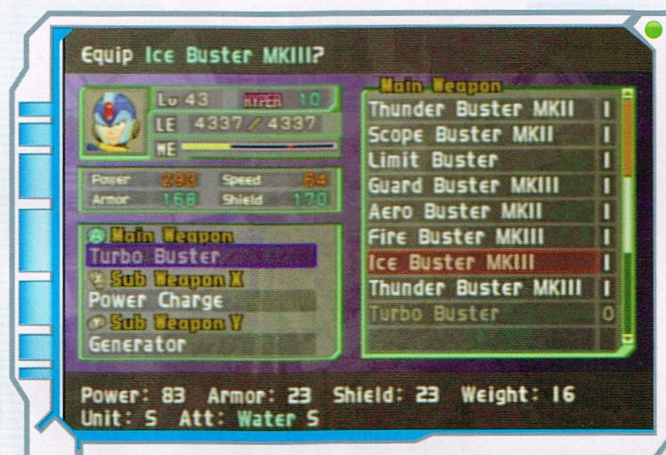

All datafiles will be updated as soon as the information becomes available...

THE MISSION BEGINS

Though the *MegaMan Legends* and *MegaMan Battle Network* series have dipped lightly into the RPG pool for their game play elements, *MegaMan X Command Mission* is the first full console-style RPG for the long-running series. *MegaMan X* veterans will recognize much from past games both visually and in terms of game play, plus new faces and techniques.

ARM YOURSELF

Each character has their own series of specialized Weapons, determining their attack styles. These also serve as your characters' armor, simplifying your shopping. Each Weapon is rated in four main statistics.

- **Power**—Determines the strength of the character's attack.
- **Armor**—Adds to the character's defense against Combat (melee) attacks.
- **Shield**—Adds to the character's defense against Shot (projectile) attacks.
- **Weight**—Decreases the character's Speed, slowing their reaction time in battle.

Weapons come in two different attack styles, Shot/projectile attacks (like X's X Buster arm cannon) or Combat/melee attacks (like Zero's Z Saber). Shot attacks are typically quicker, but as a general rule they are weaker than Combat moves.

In addition, certain enemy characters are stronger against one style of attack than another. Airborne enemies can dodge Combat attacks a lot easier than they can Shot attacks.

Other enemies have shields that are specially designed to block one or both types of attack.

SUB-WEAPONS & WEAPON ENERGY

Along with their primary Weapon, each character can be quipped with two Sub-Weapons. Sub-Weapons cover a wide range of effects, from direct attacks like missiles, to temporarily increasing character statistics such as damage resistance or attack power, or even increasing the amount of Zeny an enemy drops upon defeat. Sub-Weapons can only be used before you use an item or your main attack.

Sub-Weapons are powered by Weapon Energy; each turn, your characters gain a certain amount of WE. Naturally, more powerful Sub-Weapons require more WE to activate, which may force a character to wait a turn before using it. Each character's starting WE amount, and the rate of their WE gain, can be altered with the use of certain items.

KNOW YOUR ELEMENTS

Some attacks are imbued with Elemental properties, which give them extra power against certain enemies. Attacks can be given Fire, Water, or Thunder-Element properties. Striking an opponent with an Element they're weak against does extra damage, indicated by a star. Some enemies absorb damage from certain Elements; attacking them with the wrong Element heals them instead!

ORDER OF BATTLE

At the bottom right of the screen is the X Order readout, showing you the order in which your characters and the enemies attack, as well as their current LE amount. Pay very close attention to this, and use it to plan strategy.

However, this order is not set in stone. Changes in a character's Speed naturally effects the battle order. Also, defending, using a SubTank, or using an item takes less time than a normal attack, so that character's next turn comes up faster. Conversely, using an Action Trigger (see "Action Triggers") takes more time, and pushes back their next turn in the order.

SUBTANKS

Just as in the original *MegaMan X* games, the SubTanks are used to restore your characters' Life Energy at any time in the field, or in the middle of battle. Unlike the original games however, you do not use up an entire SubTank every time. You have a couple of different ways to use your Tanks, each one consumes a certain percentage of Tank Energy. Used Tank Energy can be restored by yellow Item Gems, or by receiving Tank Energy from defeated opponents.

Choose a character to heal

Sub Tank	Used %	Character	LE	WE
Life Gain 25	20	Lv. 41 Cinnamon	3399	3399
Life Gain 50	33	Lv. 43 X	4337	4337
Life Gain MAX	60	Lv. 43 Zero	4537	5140
All Life Gain 25	50	Lv. 42 Massimo	5245	5521
All Life Gain 50	80	Lv. 42 Axl	3131	3931
All Life Gain MAX	100	Lv. 41 Marino	4176	4176

User: Single
Recover 25% of LE MAX

You start with two SubTanks, but over the course of the mission this can be raised to ten. You receive three whole Tanks, but the remaining five must be assembled from Tank Parts. It takes four Tank Parts to assemble a whole SubTank, and you cannot store energy inside an incomplete SubTank.

ACTION TRIGGERS

Every character has a special move that can only be activated when their WE is above 50 (the WE bar turns green when the Action Trigger is available). The character's WE is consumed to power the attack, which requires you to perform certain moves to successfully execute.

Each character's Action Trigger has a different method of determining the power or nature of the move. For some, like X, the WE is used directly to determine the potential maximum power of the Action Trigger. Others, like Zero, use their WE to lengthen the amount of time of their activation phase, allowing you to input more commands. Know when to conserve your WE in battle so you can unleash more powerful Action Trigger moves.

HYPER MODE

Every character also has a second form, the Hyper Mode. These new armors change their statistics drastically, and in some cases even give the character new abilities. These Hyper Modes are incredibly valuable, and can prove to be the key to victory, especially against powerful boss characters.

While you can access these Hyper Modes any time the character's turn comes up, each one only lasts so many turns, and that number varies for each character. Also, your available Hyper Mode turns do not replenish at the end of battle. The Gain Hyper item can restore your used Hyper Mode turns, but these should really be conserved for hard battles. A recovery bed, or friendly healing Reploid, can also recharge your Hyper Mode, and this also happens when a new EXP level is reached. The Build Hyper item permanently adds one more turn to the character of choice's Hyper Mode duration. Certain characters like Zero and Axl, who have an incredibly low Hyper Mode duration, should be augmented with these right away.

Hyper Modes aren't always helpful. If you find yourself in a situation where a character in Hyper Mode can't effectively make use of it (for example, X in his X Fire Mode going up against enemies who absorb Fire damage), select "Cooldown" from the battle menu to switch back to normal mode and conserve your Hyper Mode turn. You can still attack as normal on the same turn as a Cooldown, so don't worry.

Your available Hyper Mode turns are only diminished if the character's next turn comes up while they are still in Hyper Mode. If you activate a Hyper Mode and end the battle before the Hyper character's next turn comes up, you've lost nothing!

FINAL STRIKE

Once your party grows to three members, you earn a powerful new skill, the Final Strike. Each time you attack an enemy, a yellow bar with an orange left end appears, indicating their current LE. As your attacks land, the bar depletes. By the end of your character's turn, if they have depleted 75% or more of the target's remaining LE without destroying it (the bar will show nothing but orange), you are prompted to initiate a Final Strike to finish it off. (You can cancel and continue as normal if you wish.)

During the Final Strike, all three active party members totally annihilate the target enemy. Hit the three attack buttons within the time limit to pile on the damage. Each character has a different style of attack during a Final Strike; characters that use Combat moves get in fewer hits but do more damage, while Shot attacks are weaker but faster. If "Break Down" appears that means the enemy has had their LE depleted, but by no means should you stop pounding on them. Use every second to pile on the damage, because using the Final Strike gives you bonuses!

At the end of the Final Strike the amount of damage you have done, and the number of hits that you have landed, are totaled up and used to determine the bonus amount of Force Metal Energy you receive from your fallen foes. Also, the character that initiated the Final Strike gains bonus Weapon Energy.

Final Strikes are not limited to just a single enemy. By using attacks that hit multiple targets at once, you can initiate a Final Strike against multiple foes! Use the directional control to change the enemy being targeted to make sure you get them all. The more enemies open to the Final Strike, the more time you have to attack, which in turn means more hits and damage, which means greater FME% and WE recovery bonuses.

FINAL STRIKE

ENEMIES	TIME	WE GAIN
1	4 seconds	25%
2	6 seconds	35%
3	7.5 seconds	45%
4	9 seconds	55%

SWAP OUT

Once your party grows to four members, another combat option opens up; Rotation. You can only have three active party members at a time in combat, but you can swap out your characters in the middle of combat if you find you need a reserve unit's special skills. You can only exchange characters at the beginning of a turn, but the incoming character is allowed their full range of attack options right off the bat. The only penalty they suffer is that they don't get the WE gain from a new turn until their next turn.

See Chapter 3-1 for a complete rundown of the available player-characters and their Weapons, Action Triggers, Hyper Modes, and Final Strike attack styles.

FORCE METALS

The entire reason Giga City exists, Force Metals augment your character's abilities when installed. There are Force Metals that raise a character's maximum Life Energy, add to their base statistics (Power, Speed, Shield, Armor), increase their immunity to Elemental attacks and status changes like Blind, and many other effects. The right combination of Force Metals can really turn the tide of battle.

Not every character has the same capacity for Force Metals. X can equip four pieces of Force Metal, while Zero is only able to equip two. On top of that, each Reploid has a different level of immunity to the negative effects of Force Metal.

Every Force Metal has an Erosion rating; this dictates the level of damage done to a Reploid that has installed it. Typically, the more powerful the Force Metal, the higher its Erosion rating. Each character's Immunity rating indicates how much Force Metal Erosion they can take without any negative effects. As you plug Force Metals into your Reploids, make sure the total of Force Metal Erosion is equal to (or lesser than) their Immunity total, or else they will suffer negative effects. Naturally, a higher ratio of Erosion over a Reploid's Immunity level causes greater Erosion effects.

Force Metals are normally obtained from enemies or purchased in shops. Once you earn the Force Metal Generator, you can make the Force Metals of your choice!

In order to make a piece of Force Metal, you need the proper recipe, the ingredients to make it, enough Force Metal Energy to forge it, and your character must have reached a certain level. Recipes are obtained in quite a few different ways; check the Generator's Force Metal list to see the criteria for obtaining recipes. Not every kind of available Force Metal can be created by the Generator, however, some you have to find on your own.

PICK YOUR PLATFORM

MegaMan X Command Mission is available for both the GameCube and PlayStation 2 game consoles. Both games are almost completely identical, but each one has exclusive bonus features. Neither affects the storyline or how you play, both just have nifty extra stuff for you to enjoy.

As you progress through the PlayStation 2 version of *Command Mission*, one exclusive Item Gem appears. But this Item Gem contains an interesting item indeed, a trial demo of the upcoming *MegaMan X8* game!

Throughout both versions of the game, you collect Figure Tokens that are exchanged at special vending machines for viewable action figures of various characters. The GameCube version has a special vending machine with 36 figures that are found only in that version of the game. This machine takes Treasure Tokens, which are lying around the various levels, but can only be found by linking the Game Boy Advance to the GameCube and using the Treasure Radar option, once it has been unlocked in the storyline.

INFILTRATE GIGA CITY!

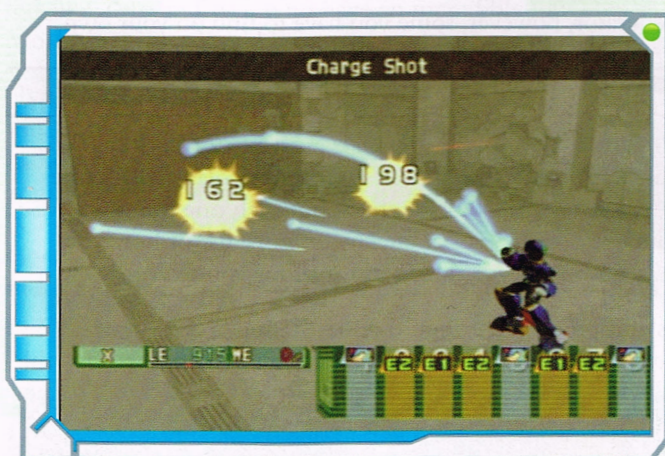

BOSS: HIPPOPRESSOR

NEW ENEMIES

ENEMY	LE
> Bat Bone	100
> Bit	150
> Preon Bitmaster	500
> Preon Chaser	600
> Wild Patrol Dog	400
> Wild Rescue Dog	600

Maverick Hunters X, Zero, and Shadow have been dispatched to enter Giga City and locate the Rebellion commander Epsilon. As they enter the Lagrano tower ruins, X is separated from his teammates. Looks like he must make his own way up and reconnoiter with his allies, with only a Vaccine Program, Reboot and 1000 Zenny to his name.

When fighting multiple Bat Bones, don't take them on one at a time. They won't attack until you destroy one of them, so take them all out in one fell swoop with the Charge Shot instead, saving your LE.

X

The main man, X packs in power and versatility, and is a party mainstay. Specializing in projectile attacks, he begins with a pair of Micro Missile Sub-Weapons to increase the amount of damage he can inflict in a single turn.

X's Action Trigger-activated Charge Shot is the easiest of the special attacks to use. Simply hold down the attack button until you reach the maximum available charge. (You can of course release the button sooner to not use up all your WP.) This attack is excellent for hitting multiple targets, plus the higher the charge rating, the higher the chances of a critical hit.

In his X Fire Hyper Mode, X changes tactics a bit switching to mainly close-range Fire-Element power attacks. The Charge Collider, a single-target attack that does massive damage, replaces his Charge Shot in this mode. His Sub-Weapons also change to the Fire-based Shell Buster attack and the Power Charge, which increases his attack abilities during the fight.

Once inside Area 1F-East of the Ruins, head south. Dash through the blue crystals to pick up **50 Zenny** and a **Build LE** item, which adds 10 Life Energy points to your maximum. Install this right away.

The first door to the south has a vital piece of machinery in it, a Save Point. These devices are handy indeed, so be sure to make good use of them.

The southernmost door is locked, but that's no problem. Check the southern of the two doors on the west side of the hall; inside is a control room that puts you in contact with Zero, who opens the lock for you. Make your way up the stairs quickly into Area 2F-East.

The yellow gem here restores **25 Tank Energy** points. Don't worry if you break it with a full SubTank, it will be there when you return. SubEnergy recharges only vanish if they're actually *used* to recharge your Tanks.

Take the first doorway west, inside is an experimental Reploid research lab. Check out all four development pods; those names are quite important. Zero calls afterwards and unlocks the southernmost door.

Return to 2F-East and enter the next door south for an **Anti-Lock Item**. The next door down holds two gems that combine for **100 Zenny**. Head for the final door in this hall, which is now unlocked. Now, dash up the stairs to 3F-East there's nothing more of note here, so make it speedy.

Once on the third floor, take the first hallway to the west to find another Reploid development room. This room is the one where Epsilon himself was created. The yellow gem on the way has a **SubEnergy 25** refill inside if you need it.

The next door south has a green gem that contains the **Melt Missile Sub-Weapon**. While this missile does less damage than the Micro Missile (and eats up a little more Weapon Energy) it can reduce the target's shielding by 10%, which can be handy when following up with other attacks.

Pity you don't get far before a Rebellion guard unit shows up. The Preon Chaser Mechaniloid is much tougher than the enemies you've fought before. Its Stungun can really slow you down, and the Greedy machinegun attack is especially painful, but thankfully not too hard to dodge. Use the Melt Missile attack to weaken him, and plow away with the X-Buster. X's Hyper Mode! Get used to this Mechaniloid's looks; you'll see a lot of Preon units throughout the game.

The next door down has the security terminal needed to get you up to the next floor. However, you must synchronize the signal with Zero's in order to pass. Hit the button when you hear the *third* signal pass. Thankfully, it's pretty forgiving about timing.

The fight with the Preon unit gets you two pieces of Force Metal; **X-Heart** and **LE +100!** Put both of them in your inventory to give him a second shot in battles along with a nice LE boost. Be warned, the **LE +100** slightly increases X's chance of succumbing to Force Metal Erosion in battle. The yellow gem in the stairs to the fourth floor has a **SubEnergy 50**, also handy, especially after that last fight.

This hallway has Preon Chaser units in it as well, so be ready for some tougher battles. The southern end of the hall on the fourth floor has a few goodies, so hit this area first. This hall harbors a **Build Shield**, a **Backup**, a total **Tank Energy** refill, and a **Save Point**. Grab them and save! Things are about to get interesting. The doorway here is locked, so its time to backtrack.

The fourth floor also has Preon Bitmasters, which call Bits in to assist in fighting. Focus on the Bitmaster, and use the Charge Shot when it's available to wipe out all the Bits at the same time.

Return to the branch hallway on the northern end; Zero's waiting just inside the door! A valuable addition to your party indeed, and good timing to boot, since the massive Hippopressor interrupts the reunion!

ZERO

The other main man, Zero is all about power-slashing with his trusty Z-Saber beam sword. He hits multiple times each attack, adding to his offensive power. His exclusive Heat Haze move makes it harder for opponents to hit him, sparing his LE.

However, he has one less Force Metal slot, and his immunity to Force Metal Erosion is much lower.

Zero's Command Arts Action Trigger attack is considerably different from X's and requires some old fashioned Capcom-style fighting-game maneuvering to use. Within the time limit provided, successfully complete as many joystick/button combos as you can (the combos are displayed to the left). Once time is up, Zero will unleash a flurry of attacks depending on how many combos you completed, racking up massive damage to a single target. Naturally, the more difficult combos are the more powerful ones.

The Black Zero Hyper Mode really ramps up his offensive capabilities; each Saber slash does massive damage. Unfortunately, this only lasts three rounds, so save it for finishing off your opponents to prevent Hyper Mode depletion.

BOSS ALERT

HIPPOPRESSOR

The Hippopressor's name is well deserved; one of its attacks involves smashing its opponents under its bulk, hitting multiple targets. Thankfully, Hippopressor is a slow and easy target. For your first boss fight, that's a good thing.

Have X concentrate on the 300-LE Shark Missile on top of the Hippopressor's back. Destroy it before its launch sequence finishes, or else one of your boys will eat some hefty damage. The missile will regenerate eventually, so keep an eye on it. Use a single Micro Missile and two X-Buster shots on the missile to finish it. Save the Charge Shot until you have %100 WE charge; that's the time to let loose with it for critical damage to the Hippopressor while also removing the missile threat.

Zero's job is to slice away at the Hippopressor itself. Stick with normal attacks and let his WE build up; you need a full reserve later in the fight. Eventually the machine's head will be destroyed. However, that still leaves the body to contend with. To make matters worse, there's a new attack; the Hippo Particle Cannon. This beam slows down the Hunters if it connects, letting the Hippopressor get in even more attacks.

As such, now is the time to open up the Hunters' Hyper Modes and augment them with Action Trigger attacks. They both do considerably more damage in these forms. Don't forget about the Shark Missile, it is still a threat. Have X target the missile while Zero smashes the rest of the Hippopressor. Once it's down, you earn a **Fire Missile** Sub-Weapon, the **Guard Buster** weapon for X, and a hefty amount of Zenny and EXP.

Check the room after the fight; the green gems hold and **Power +1** Force Metals. If you install them, do so rather than Zero. Make your way out the other door.

Just inside Area 4F West is a red gem containing **Tank**. You're now one-fourth of the way to having another 80 Zenny. There's also **80 Zenny** within a blue item gem further down. There's nothing up the stairs to floor 5, so just dash like

There's a **Vaccine Program** and **Reboot** in an alcove on the fifth floor. From there, simply make your way to the door.

X and Zero are reunited with Shadow, but he's not alone... Epsilon is waiting for them as well! And guess who's turned traitor! To make matters worse, the members of Epsilon's Triumvirate arrive as well. The winged Ferham, the lance-wielding Scarface, and living sonic weapon Botos are all here for the party. Zero is sent flying (removing him from your party), and X has no choice but to make a strategic retreat.

Don't worry if you've equipped Zero with any Force Metals or nice Sub-Weapons. All of his equipment is automatically removed and placed back in the pool once he's gone.

RECAPTURE CENTRAL TOWER!

BOSS: WILD JANGO

NEW ENEMIES

ENEMY	LE
> Einhammer	1200
> Mettaur	550
> Preon Spark	1100
> Sinedropper	200
> Zennydropper	280

X wakes up in "New Hope", a hideout for the Resistance against Epsilon's Rebellion. This room is safe from random enemy encounters, there's a Reploid girl selling items, plus the recharge bed is always available for use.

NEW HOPE ITEM SHOP

ITEM	COST
> Vaccine Program	80Z
> Anti-Lock	80Z
> Cure One	240Z
> Reboot	500Z
> Mega Fire	160Z

Once outside, the random enemy encounters are to the advantage of the free recovery bed and stick around to raise X a few levels and earn some spending Zen. You'll want to be prepared! Just watch out for the Wild Replids, because they can restore other enemies' LE.

The tower is basically a huge counterclockwise spiral going upwards; the clockwise path down is blocked off due to construction. Along the path is a **Clear Vision**, a **Vaccine Program**, and a **Build Power** before you hit the next level.

Air City Gate is free of enemies, however there is little of interest, save a handful of Replids. The path further up the tower is blocked off for construction, so take the elevator to the east.

Access Tunnel E-1 has a **Gain Hyper** in a blue gem that restores your Hyper Mode duration back to max. There is also **Tank Energy 100** within the yellow gem.

There's a dead-end hallway to the north at this point. If you're playing the GameCube version, this hallway is empty. If you're playing on the Playstation 2, you find a special item here, the XB Trial Key. This item opens up a special option on the main screen; the ability to play a trial demo of MegaMan X8!

Upon entering Air City's East Square, the city is put on alert by the Rebellion, warning its citizens to report X upon sight. Don't worry, the Reploids here won't report you, so go ahead and chat with them. You can enter the door to the south, but it proves to be a dead-end because the shopping district is shut down right now.

The hallway to the north has a Save Point. Be sure to take advantage of it, especially if you've been building up your levels. There's not a whole lot going on in 3rd Street or North Square beyond. Talk with the Reploids there if you like, but keep moving.

Outside, X runs across a large Reploid who's reported him to the Rebellion. The Reploid doesn't get much chance to do anything afterwards, though, as he's destroyed by a mysterious black Reploid who's ready to take a piece out of X himself.

BOSS ALERT

SPIDER

LIFE ENERGY 1800

POWER 40

ARMOR 30

SHIELD 26

SPEED 32

DAMAGE %

FIRE	WATER	THUNDER
150	100	75

Spider seems pretty intimidating at first; his Counter Card blocks your attacks, and his various card attacks can hit multiple times. Thankfully, this card-shark is bluffing big time.

Simply go right into Hyper Mode, and step on spider! He has a weakness against Fire-based attacks, so he takes extra damage from all of X's Hyper Mode moves (as indicated by the star on his damage display), which also cuts right through his Counter Card defense. Open up with a Charge Collider, and follow up this attack with whatever makes you happy; Spider beats a retreat pretty quickly.

Spider books it, and it's of course time for X to follow. In Access Tunnel E1's northern section, there's a figure vending machine. Plug in the correct 8-digit password, and earn a spiffy action figure.

There's a trio of item gems near the vending machine. Grab the **Power Charge** Sub-Weapon, **Tank Energy 50**, and **100 Zenny**. The doorway leads back to the Air City Gate, but on the other side of the construction. There are random enemy encounters, so be careful!

Aile, one of the top members of the Resistance, is around the dark u-turn, and he's in pretty rough shape. He's been searching for Chief R, but realizes X has a much better chance of finding him. One squad of Preon Chaser is the owner of **Aile's ID**, and on the other side of the doorway. No place to go but forward!

Inside the Tower Base Access Tunnel, be sure to snag the **Hyper** and **Mega Fire** along the way. The tunnel is crawling with Mettaurs, who take considerably less damage when tucked up under their helmets. Open up Hyper Mode to bust through and take them out fast; their Strike attacks deals considerable damage.

The second part of the access tunnel has **100 Zenny** and a complete **Tank Energy Recharge**. Stick around here to build up experience, using up your SubTank energy. Take the Tank Recharge and move on.

Be sure to grab the **Build Armor** and **Build Speed** upgrades in the north and south sides of Equipment Maintenance B, hidden behind the shelves.

Equipment Maintenance A has a Save Point, which is often a sign of bad things ahead. Save your game and get ready. The western door is a supply closet that contains **100 Zenny**. East is the way to go now.

At the top of the ramp, a soldier begs for help rescuing his pals behind the door. They're held by a group of Preon Chasers, so of course you have to smash 'em. There are only two of them, no big deal.

With the hostages freed, X gains the **Security Card**. The Reploid girl trio here is quite a valuable find, since they each have items for sale. You can trade in your current Main Weapon to Cumin for a discount on a new one if you wish.

JASMINE'S FORCE METAL SHOP

ITEM	COST
> Thunder Guard	500Z
> Power +1	120Z
> Armor +1	80Z
> Shield +1	80Z
> Speed +1	120Z
> Virus Protection	80Z
> Bind Protection	60Z
> Decoy	1000Z
> Analyzer	1000Z

CUMIN'S WEAPONS SHOP

ITEM	COST
> Fire Buster	500Z
> Guard Buster	500Z
> Fire Missile	1500Z
> Micro Missile	300Z
> Tomahawk	400Z

SAFFRON'S ITEM SHOP

ITEM	COST
> Vaccine Program	80Z
> Anti-Lock	80Z
> Cure One	240Z
> Reboot	500Z
> Mega Fire	160Z

Once you've done your shopping, check out the three doors here. The western door contains **200 Zenny**, the northern one has an **Ultra Fire** item, twice as powerful as the Mega Fire item. Before you go, talk to the Reploid sitting on the bench to the southeast, he restores your LE to full!

Data Backup Room Hall A has a yellow gem with a **Tank Energy 25** inside. The door to the east is a dead-end with a locked door. The western door has an **Eagle Eye Force Metal** at the dead-end hallway immediately south.

Spider's waiting for X at the end of Data Backup Hall B. Aile's ID gives him pause... and turns him against the Rebellion. Once he's run off and smashed the guards, keep on going in the direction you were headed.

Jango doesn't take too kindly to R's rescue, or Spider's betrayal. In fact, he's ready to reduce the entire tower to a smoking pile of rubble! Guess whose job it is to stop that from happening?

Yep, that's a timer down at the bottom of the screen. Guess what happens if it runs to zero? You need to get to him in a hurry, so make liberal use of the dash. There's **100 Zenny** to the west, but that's not worth the time. Instead, go east, back the way you came.

Make your way through the hallway to the cell where R is being held. A Preon Spark unit is there as well, tougher than the other Preon units you've faced previously. Luckily for you, it takes extra damage from Fire attacks. Between Fire Buster, Fire Missile, and X Fire Hyper mode, you should have plenty of Fire attacks to dish out. In fact, there isn't even a need to waste a Hyper Mode round on it.

A pair of Preon Bitmasters block X's path. Thankfully, the timer pauses during the fight. Save your WE for Charge Shots to clear out the Bits while damaging the Bitmasters too.

Once in Data Backup Room Hall A, take the eastern door. Two Preon Chasers are waiting at the top of the ramp, but they're easy prey. The door that was previously locked is opened thanks to Chief R.

In the Command Center staff room, take the door to the north for a fight against a pair of Preon Bitmasters. Take them out and claim the **Tank Parts** in the room, getting you even closer to a new SubTank. Then dash like mad to the east and up the ramp.

At the base entrance, dash north to get a **Tank Energy 25**. Just keep going north through the Gate Baseway; the doors to the east and west are both currently locked. There's a Preon Spark flanked by a pair of Chasers waiting for you inside the Command Room. Take out the Spark first with the Fire Missile and Fire Buster, saving a little built-up WE for a Charge Shot.

Once the Preon units are destroyed, dash to the end of the room and hit the switch to deactivate the self-destruct. Jango tries to make a break for it, so backtrack to the Base Entrance.

SPIDER

Spider has decent speed, and his Sub-Weapons are certainly useful. His Twin Missiles strike twice, but the really nice one is his Item Capture, which

can yank items from enemies immediately. He really only has four varieties of card attacks; each one has a different bonus effect when his WE is above 75%. The Spade series are especially useful against crowds, since their bonus effect is to strike all enemies at once.

His Fortune Card Action Trigger move is incredibly risky, basically playing a hand of poker. Five cards are drawn, and you have the option to re-draw as many of them as you wish (including leaving the hand as it is). The stronger the hand he deals, the more powerful his attack is. A lousy hand means lousy damage.

The Trickstar Hyper Mode only lasts two rounds, but renders him an invincible shadow during that time. Quite valuable, this is best used when his LE dips low.

Take the eastern door at the Base Entrance, and use the Save Point wish. Dash your way up the ramp to the Large Heliport Access Tunnel where a **Backup** and a **Tank Energy** are waiting inside item gems. Pass through the big gate to meet up with Jango.

Jango's not the only one at the helipad; Spider's there too, and the boy is he upset. He joins your party to beat the spots off the bionic bobcat.

SHIELD	24
SPEED	56
DAMAGE %	
FIRE	150
WATER	100
THUNDER	ABSORB

Jango is fast. Fast fast fast, and can get even faster as the fight goes on. He also has Thunder-based attacks, and enjoys inflicting Viruses on the Hunters as well to slowly drain their LE. Thankfully, he is weak to Fire-based moves, of which you have plenty.

Let X's WE charge up to %100, then unleash his Hyper Mode Charge Collider move to do some massive damage. Stick with X's Fire attacks, letting Spider heal if needed. Jango does a great deal of damage, but exploiting his Fire weakness sends him down pretty quickly. His defeat grants you a complete **SubTank** as well as a **Thunder Buster** for X.

Turns out Spider knew Aile a long time ago, hence his sudden turn against the Rebellion. Now that Chief R is free, the Resistance has a new hope for defeating Epsilon!

The tower is back in Resistance hands, but without a skilled operator, its usefulness is severely reduced. The best operator in Giga City is Nana, but unfortunately she's held captive in the Tianna Island mines POW camp.

Air Bus Staffer
This is the Air City Air Bus Station.
with flights to Air City South Square. v

You don't have to go to the mines right away. Instead, leave the control room and take the Air Bus over to the re-opened shopping district. The entire Central Tower is now open for you to explore.

There's a figure vending machine.
It reads:
2 Figure Tokens.

In South Square, pick up three **Figure Tokens** for use at the Figure vending machine. Head back here and spend your Figure Tokens after each mission. Once you have a figure, head over to the shopping district proper. Remember to keep coming back; as stock changes the further you go into the game, especially the weapon shop.

The arcade's teleport center enables you to revisit old locations. At this point, that's only the Lagrano Ruins. There are a few doors still locked there; come back later once you have the keys.

Once you're done shopping, return to Chief R and talk to him to be teleported to the Tianna Island mines, and actually start the mission proper.

More security Reploids are in the next hall. You have to be quick to snag the **Figure Token** from the first alcove to the north. The area between the first and second pillars after the first security sweep is a safe zone; watch the Reploid's movements and dash for the alcove northward, which has a **Decoy Force Metal** inside.

Once Spider's done grumbling, just dash through the hallway. Inside is a massive Reploid named Massimo, who apparently has quite the reputation as a powerful warrior. Why is he so jumpy? He joins your party and enables you to use the 3-bot Final Strike ability.

There's a Save Point just to the north of where you met Massimo. Not only can you save from here, but this Save point also enables you to return to New Hope, if you want to do a little shopping for Massimo.

Head north and take the lift down a level. There's a security system on patrol here; stay out of the fishy Mechaniloid's line of sight, indicated by the red waves. If you get caught, you're sent back to the glowing spot at the beginning of the area. There's a **Figure Token** and **300 Zenny** in the alcove here, snag them and head east.

MASSIMO

Naturally, pure power is Massimo's game. Slow and steady smashes the skull. But since he starts up at level 1, his stats aren't too great. Thankfully, it only takes a couple fights to ramp him up. He does have a severe disadvantage in the Force Metal department; he has only two slots for them. To make matters worse he's also weak against all Elemental attacks; he's slightly saved by having a Water Guard Force Metal installed right away.

Massimo's Berserk Charge Action Trigger is fairly simple to power-up. Rapidly tap the buttons indicated to raise the power and added status effects of Massimo's attack. The higher the

WE when activated, the more time you have to charge up the attack.

His Glint Armor Hyper Mode is basically a temporary power-up. During this mode his LE maximum is increased by half, and his Power, Armor, and Shield ratings all get boosts. Not only that, but he gains more WE per round while in Hyper Mode. This mode is best saved for use against bosses.

The doors to the east and south are both patrolled by security Reploids, so you have to be fast. The eastern door leads to a little room with a **Thunder Missile Sub-Weapon**. This weapon is especially effective against the Blowfishes and Puffers in the mine. Turn back carefully, and continue south.

The lift down leads to the Prisoner Admission Division, where random enemy encounters are back in effect. The eastern door is locked, so head west and grab the **Boost Armor** on the way.

Grab the **Figure Token** at the far end of the hall, and hang south through the unlocked door. Inside is a lock release for the cells you've passed, so hit it and backtrack for a **Build Speed** and a **Mega Thunder**. Return to the west end of the hall and take the doorway north.

Go down the next lift and say hello to a trio of guardian Reploids. Make sure your party is healed up before you step forward to take them on. The Dober Man Reploids can call for backup units, but the Big Monkey is a powerhouse best taken care of as soon as possible. Besides, the extra EXP from the Dober Man units is a blessing in disguise. Use the Save Point after the fight to get ready for some exploring.

Enter the door immediately north to enter the West Prison. Hit the switch to open the cells, and enter each one to talk to the Reploids within. The first cell to the west is a Dober Man in disguise, so be ready for a fight. The inhabitant in the next cell to the north gives you a **Water Guard**, plus there is a **Reboot** and a **Jack of Hearts Weapon** for Spider in the other cells.

Wade into the shallow water to enter the final cell. The Reploid inside has the **Prisoner ID** that unlocks the gate on the west end of the prison floor. Be sure to save again!

Backtrack and make your way east, picking up the **T Energy 100** if you need it. A trio of Big Monkey guards are waiting for you, but once again you can see them before they attack, so make sure your troops are full up on I. Luckily, Big Monkeys are weak against Thunder attacks, which X should be loaded down with by now.

Head north and open up the cells with the control panel. The southeast cell has another disguised Dober Man, the northeast cell has a **Figure Token**, and the north cell has 400 Zenny.

Go down the lift, into Maze Area 1. Not a very encouraging name, is it? There's a **Tank Energy 50** at the northern end of this hallway. The southern door is locked and won't open without the Tianna Key, so you must come back later. Make your way to the north, where you get a scene with the captive Nana and the prison warden Silver Horn.

Keep moving south, eventually you reach a Save Point and a **Tank Energy 50** in the yellow gem. Save your game, and take the next door. The two security panels on the floor must be hit in the correct order. Nana shows you the order; copy it to move on.

Keep going east until you reach the split; take the south split for a dead-end with **Build Armor** and **Build Shield** power-ups. Both of the doors north lead to the same area, so just take the one closest into Maze Area 2.

There's a **Tank Energy 50** in the yellow gem in this hallway. Veer east right away to the room at the end of the path. This room has a trio of item gems containing **Warm-Up**, **Boost Power**, and **Boost Shield**. Now, head all the way to the west, the room there has a **Tomahawk Sub-Weapon**. Take the only door north now.

One long lift later and a short hallway later, you're in the Dark Room. Head forward to meet Nana, guarded by a Preon Pod and two Preon Sparks. The Pod takes double damage from Thunder attacks, so use X's Thunder Buster and Thunder Missiles, which also interrupts its launching sequence. Have Spider and Massimo concentrate on the Sparks, and it's over in no time.

It turns out that Nana's been doing a little subterfuge while held captive. Odd thing though, her records say that Massimo had been executed days ago! Nana sticks in the Dark Room to keep Silver Horn unawares while the trio hunts him down.

Welcome to the Security Panel Area. Thankfully, Nana is around to show you the correct code (blue, red, yellow) to unlock the western door. Hit yellow, red, then blue to unlock the eastern door, a treasure trove with a **Build Shield**, **Build LE**, **Build Armor**, **Build Speed**, and **Build**

The light show is a *lot* faster this time around so be sure to pay attention. Yellow, blue, and red to unlock the southern door and send you on your way. The red gem in the center is protected by a force field; unlock it with blue, yellow, and red and claim its **Tank Parts**. And finally, red, yellow, blue unlocks the northern door, netting you four **Figure Tokens** and gems worth 1000 Zenny.

The next room has four panels in its security system, colored on yellow, red, green, and blue, to open the door to the Deep Prison Area. Again, the item here is protected by a force field. Unlock it with green, blue, red, and yellow to get the **Queen of Diamonds** for Spider.

Use the Save Point here, then have a nice chat with the guards, who thankfully don't attack you. All that's left

go north. X and Spider wait for Nana to boot up the unlocker, Massimo is off...

At this point, consider returning to New Hope and stocking up on supplies, especially Water Guard Force Metals and Thunder-based weapons.

X and Spider must go it alone for a little bit. Slip past the now-clobbered guards and take the lift down to the Deep Prison where Massimo's waiting. He's back in your party now, but it sounds like Nana's in trouble! Return to the now-unlocked door, collecting a **Gain Hyper** and a **Tank Energy 100**.

Silver Horn is *not* a nice Reploid at all. Not only is he quite happily hurting Nana, but he also quite enjoys mocking those he cruelly destroyed. This certainly pushes all of Massimo's buttons. Get ready to turn the tables!

SILVER HORN

LIFE ENERGY 17000

POWER 74

ARMOR 44

SHIELD 42

SPEED 88

DAMAGE %

FIRE	WATER	THUNDER
100	ABSORB	150

He's big and nasty, and packs a major wallop. Most of his moves are Water-based and attack the entire party, so have Water Guard Force Metals installed in everyone to keep the damage down.

X and Massimo are your heavy damage-dealers for this fight. Have X use a Thunder Missile/Thunder Buster combo, which still lets him build up WE for a Thunder-based Charge Shot. Use Massimo's Berserk Charge as soon as it's available. Spider is best utilized healing the party with SubTanks, and using the occasional Mega Thunder attack.

Once Horn coats his body with liquid, things get a lot tougher. His defense is raised considerably, especially against Thunder based attacks. Turn to X's Hyper Mode to deal the big damage at this point and finish him off. An **Ice Buster** and **Build Hyper** are yours once he goes down.

GAUDILE LABORATORY

BOSS: DR. PSYCHE

NEW ENEMIES

ENEMY	LE
> Killer Mantis	4000
> Mettaur Commander	2000
> Pararoid	200
> Preon Elite	2200
> Preon Gunner	1700
> Rabbid	1200
> Radar Killer	4400

The Resistance's next plan is to try and recruit Prof. Gaudile, a Force Metal researcher who's shut himself away from both sides of the fight. Sure, it means sneaking into his lab, but these are desperate times. Talk to Nana, who has helped open up a few more options at New Hope for you. Spend a little time working with these new features, then talk to Nana again to get your mission started. Don't forget to check out the Shopping Arcade because the shop stock has changed as well.

MECHANILOID DEPLOYMENT

One option available now is the Deployment Center. Here, you send a team of three friendly Mechaniloids to different levels for them to seek out items that are otherwise inaccessible to you.

Mechaniloids are split into three types. One set are robots, who mainly bring back Zenny. The next focus is on finding items. The final is focused on bringing back Discs of data. Judge the various Mechaniloids' skills and you decide which ones to send into what area. When they return, they not only bring items, but have raised their experience as well. The higher the Mechaniloid's level, the more likely they are to enter more dangerous areas and come back intact. Don't worry if your Mechaniloid gets busted on the mission; they're automatically replaced so you never lose them. You're just denied their find a little bit.

For starters, send your only available Mechaniloids to explore Central Tower. It's a short and relatively easy mission for them, and a good place to build them up for the more dangerous Lagrano Ruins and Tianna Camp. Always have at least one team of Mechaniloids out hunting for stuff while you are out on missions.

The Sky Room is basically your trophy room. Here, all the nifty stuff your Mechaniloids have brought back is displayed, as well as any achievement figures you've earned from the vending machines. Check out the movie and music sections from the game, development sketches, and more. You can even change X's scarf colors!

At this point, a new feature becomes available that is exclusive to the GameCube version of the game. Attaching a Game Boy Advance to the GameCube via a link cable opens the Treasure Radar option!

Once the Game Boy Advance is hooked up and turned on, go to the menu screen and select "Treasure Radar". Once the connection is made, the Game Boy Advance's display becomes a radar screen. The yellow dots on the display are hidden Treasure Tokens, which appear as glowing blue spots on the game play screen. Return to old locations and go scavenger hunting! These Tokens are spent at the purple vending machine in Air City 3rd Street, which gives out action figures. Complete your sets!

Just be sure to turn off your Game Boy Advance when engaged in a boss fight. Why burn your batteries unnecessarily?

Hello, what's this? A **deactivated Preon unit**! X sends it back to the base, where it joins the roster of Mechaniloids you can deploy to past areas for item gathering.

In the East Deck, take the first door to the north to snare two **Figure Tokens**. Then head east to grab a **Cooler**, a **Cure One**, and a useful **Vaccine Program**.

Once you've entered Gaudile's lab, take the only route east. There's a nice warm Rebellion reception waiting for you! A Preon Elite and two Preon Gunners are set to pounce. The Elite's Order focuses the Gunners on a single party member, which leaves your other members free to attack, but certainly puts the target at great risk. It can also use Riot, sending the Hunters into Berserk status!

Once you've "met" the lady thief Reploid at the crossroads, just keep going the way you were. The fork the thief took is locked, preventing you from following. Just take the lift up a level.

In the next hallway a new security system is in place. The red floor tiles alert security if they are stepped on, forcing you into a fight. X's dash lets him fly quite safely over them. The room beyond has a **Tank Energy 25** and a Save Point as well. Consider returning to New Hope and checking on your deployed Mechaniloids. You can also send your new Preon unit out when you get there.

Head south first. It's eventually a dead-end, but there are lots of great items to be found. Take the west room to find a treasure trove of five **Figure Tokens**. Go east to locate another horde of goodies, with a deactivated **Big Monkey** for your Deployment center, a **Protect +1 Force Metal**, **Tank Parts**, **600 Zenny**, and a **Tank Energy 50**.

Return to the northern door you passed earlier. There are more red security tiles here. Simply run past the one that moves on its own, then dash over the twin systems. Dashing through the first only lands you right in the security beam and into a fight.

Just past the security is the Rebellion's Dr. Psyche, and he's after Gaudile sends a pair of Preon Elites to attack you, and this is a hefty fight. Concentrate on one Preon at a time, letting X and Massimo's WE build up to open up on the second one once the first one falls. Luckily, they're fairly slow.

Once Gaudile's new Force Metal Generator has been uncovered and you control again, snag the **Build WE**, **Build LE**, and the **LE +100 Force Metal**. Take the door south, where more security sensors are waiting, with a slightly more complicated layout. Slip past the first one normally, and time your dash over the first pairing, so you land in the space vacated by the second rover quickly over the second pair before the moving one comes back.

The next set of sensors requires more precise movement to cross safely. Stand back a little bit from the very base of the ramp, and dash from there. With proper placement, this puts you in the safe zone between the sensors.

Once you are in the Observation area, take the first fork south to pick up two **Figure Tokens** and the **Queen of Hearts Weapon** for Spider. There's a **Tank Energy 50** to the east, and the lift to the next level is north.

On the next level, stay on the path to find a **Cure All** and **1000 Zenny** spilt between three item gems. Keep moving up the path and you eventually reach a Save Point, and Prof. Gaudile as well. Looks like Dr. Psyche got Cinnamon, and with her they have the Force Metal Generator. Head south to give chase!

There's a **Build Armor**, **Gain WE+5**, and a **Build Speed** waiting in the hallway ahead, grab them and continue on to the room where Cinnamon used to be. She isn't there anymore, so keep moving and be sure to grab the pair of **Figure Tokens**.

This is the Eternal Forest area, a large branching network of paths. Gaudile encourages you to take the right path (blue arrow) to catch up with Dr. Psyche quickly, under the rationale that you can always come back later for item gathering. There's a Reploid waiting before each door, and each one has a fight for you to pass through to the next section. Once you go through a door it locks behinds you.

Taking the blue path twice from the start is the shortest route to your destination, but all you get at the end is a lousy **Tank Energy 25**. If you're feeling adventurous, try another path

through the Eternal Forest! Be warned, the more red paths your take, the tougher the fights, but the prizes at the end are so much sweeter.

ETERNAL FOREST PATHS

MARINO

An accomplished thief, Marino's quite confident in her abilities. And they're admittedly pretty impressive. She hits twice, doubling her Combat damage. Her Get Zenny Sub-Weapon increases the amount of Zenny the targeted enemy drops when defeated, which is nice for fattening up your bank account. She's also

extremely skilled at hitting hard-to-hit enemies like the Pararoid. However, she has comparatively low HP, so installing a LE + Force Metal or two is a good idea.

Her Emotional Reel Action Trigger is even riskier to use than Spider's but has some good results. A slot machine appears, and lining up three of the same symbols activates her move.

The higher her WE when activated, the slower the reels move. Thankfully there's no time limit, so study the reel patterns carefully. The blue symbol gives her an attack at double strength. The red chest symbol activates and attack with a guaranteed stolen item. And the heart symbol takes away enemy LE, and gives it to Marino.

Quicksilver Hyper Mode adds to her LE and power, but the highlight is the massive speed increase she gets. Three times as fast as she is in normal mode, Marino can really pile on the attacks in this form, often attacking twice in a row.

Once you're through the Eternal Forest and have picked up your goodies, rush down the ramp. The slinky thief-Replloid Marino is unconscious in the room at the bottom. She took a beating from Psyche's goons, and she is ready to join your party. With four members of your party now

you can swap out frontline members whenever needed, even in battle. Don't worry, your reserve units in reserve gain EXP from battle just as if they didn't fight in them!

The next room along the path normally has a **Tank Energy 50**, a **Rebo**, and a **Cure One**, but the room's highlight is the **deactivated Mettair**. One of these is a Mechaniloid for your Deployment Center. Keep moving to find a Save Point.

Go on to get a **Gain Hyper**, 100 Sub-Weapon Points, and catch up with your

THUNDER	00

Psyche's opening move is to summon a trio of 400-LE Needle trios, forcing you to deal with them rather than focus on the weirdo himself.

X's Charge Shot is perfect for taking them out right away. Even at only a 50% charge, it does enough damage to initiate the Final Strike on whichever ones weren't destroyed. However, Psyche is very fast, letting him summon another batch of Needles quickly. Spider's Spade-series cards are good here; keep his WE above 75% so the Spades strike all targets, taking out the Needles and forcing Psyche to waste his turns summoning more of them. The other members should focus on Psyche himself.

Have X stick with conventional attacks, keeping his WE up for a Charge Shot in case of emergencies. Keep an eye on when Psyche attacks in comparison to the others; if he has an attack coming before Spider can take out his Needles, unleash the Charge Shot. It might take a little time to whittle him down, but thanks to Spider's Spades, Psyche should never get a single hit in. Save your Hyper Mode turns, though. Even once he goes down, Psyche's not done with you yet.

Psyche's Mad Nautilus form requires timing to crack. If you simply unload on it, he'll Counter every move and waste you. Wait for

the armor to open up and expose his weak point—the green section behind his main horn, exposed after he uses his charged Mad Energy attack. Have Marino use her Get Zenny Sub-Weapon every round so that when Psyche does go down, he spits out a *lot* more cash. Use Spider's Steal Missile to grab Psyche's two items in this form, then have him and X stay defensive and build up their WE. Once the armor opens and you see the green, let him have it with Hyper Modes and Action Triggers. Be sure to use the Cooldown command once he closes his bulkhead; why waste Hyper Mode turns if you can't attack during them?

Watch out for his Mad Cocktail move, as it can send your characters into Berserk mode, which is bad here, because of the counters and his other attacks. Have Coolers on-hand and use them as soon as possible on your Berserked teammates. Once he's toast, a new **SubTank** and a **Virus Missile Sub-Weapon** is yours, as well as assistance from Cinnamon and Prof. Gaudile!

Return to this room later to find a deactivated Dober Man for your Deployment Center. Unfortunately, you need the Bone Key to activate it. Come back with it to add to your item-hunting army.

> Preon Nurse	2400		

With Gaudile on the side of the Resistance, base operations are even stronger. A brief communication with Redips (and conversations with numerous Reploids through Central Tower) reveals that Zero is still functioning, last seen in the Ulfat Factory, which is cranking out Preon units like crazy.

Before tackling the mission be sure to do some shopping for Marino and Cinnamon.

Once inside the Ulfat factory, alarms sound, so security is ramped up. Zero was never the subtle sort, was he? Make sure your active party has a focus on physical attacks rather than projectiles because the Preon Shielders have a force shield that counterattacks when it is hit with projectiles.

Heed Marino and Massimo's advice upon spotting the security units; you can only move freely when the Mechaniloids are in wait mode. If you move when the unit is moving and the room's lighting is red, you're thrown into a fight. Listen for the "ping" noise when the Reploid is still. After the third ping it takes flight. Pick up the **Fire Guard** and **Figure Token** in the west end of the room, then go through the northern door.

There's a **Figure Token**, **Build LE**, and an **Ultra Blizzard** in the second floating security room just north of the first. Step into the room to the left to grab **300 FME**, **1000 Zenny** and a **deactivated Rush Loader** in the furnace room proper. Backtrack and make your way northeast to the second section.

CINNAMON

She's a healer, not a fighter. She starts out at Level 1, but like Massimo, it doesn't take long for her to level up, plus she can do it from the safety of the back lines. Her Energy Field gives every party member an extra 10 WE for that round, which can really help get in the Action Triggers faster and increase their power.

The Angelic Aide Action Trigger is, like her nature, all about healing. Spin the secondary control stick in a circle as many times as possible within the time limit given, and hearts appear. Each heart means 10% LE recovery for the party, so get as many hearts as possible.

Iron Maiden! Trading in her angelic whites for some rather evil-looking black looks, Cinnamon gets a 50% boost to LE and Power, giving her attacks more oomph if needed. She's still no powerhouse, but it certainly makes her a tougher gal than she was before.

Cinnamon also adds the Force Metal Generator to your menu options. As she gains levels, she can create new Force Metals, if she has the ingredients needed. Naturally, the ingredients needed to make the most powerful the Force Metals are difficult to find and more expensive. She also needs to increase in level to make the really powerful ones.

The next security room is considerably tougher, a maze of crates. Not only that, the security Mechaniloids can block your path when in wait mode, forcing you to wait it out until they move. Be sure to grab the **Tank Parts** and the **Figure Token** on the east end of the room, hidden by crates. While there is a door to the west that leads to goodies, it's blocked by crates. Instead, go north to the next security room. There's a **Figure Token** right in the doorway, take it and go west to the smelter. You can grab the **Tank Energy 50** here if you need it.

There's a **deactivated Einhammer** at the end of the hallway past the smelting pool, but is inoperable until you get a **Ball & Chain Hammer** to complete it, so you have to come back later. Grab the **King of Hearts** weapon for Spider behind it and backtrack to the security room, grabbing the **Build WE** and **800 Zenny** on the way. Take the eastern door and move on.

There are huge piles of crates in the next room, but oddly enough no security fliers. Grab the **Build Speed** hidden at the far west end of the room, then take the northern door. A not-too-old comrade is waiting on the other side!

Grab the **Boost Speed** in the room where Axl joined, then head left to the smelter. Take the **Aero Buster** for X to the south, and continue on to grab a **Mini Battery**. There's no use for it right now, but there's a **deactivated Mechaniloid somewhere** that can use it. Return to the crate room, and pick up the **Tank Energy 50** if you need it. There's a **Save point** in the hall just east, use it and move on.

The control panels in the freight room change the direction of the conveyor belts. Use them to collect all of the items in the area: **1000 Zenny**, **WE +5**, **Tank Energy 25**, and a **Gain Hyper**, as well as gaining access to the door to the north.

The next room is yet another maze of conveyors and switches, only much larger. There are also more Preon guards waiting on the platforms. Thankfully you're spared random enemy encounters, so you can take your time finding the route to the northern door. Grab the eight **Figure Tokens**, take out the guards, and move on.

AXL

Former member of Red Alert and aspiring Maverick Hunter, Axl is in Giga City looking for clues to his unknown past. His twin Axl Bullet pistols pack a real punch, and he comes equipped with a pair of fairly hard-hitting Sub-Weapons. He's also quick, letting him get in more attacks rapidly. While it may be tempting to use

him right away, don't swap him in at the expense of a physical combat specialist like Massimo or Marino.

His DNA Change Action Trigger is incredibly daunting to use. With each boss defeated, Axl can use their DNA data to change into them and attack. In order to activate it, you have to press the correct series of buttons along the chain that leads to the available boss form. The higher Axl's WE, the longer the time he has to complete the chain. It's tricky, but incredibly powerful.

His Stealth Mode, much like Spider's Hyper Mode, makes him an untouchable shadow, as well as doubling his power. Unfortunately, it only lasts two rounds (unless augmented with a Build Hyper), and his Speed takes a 25% hit while cloaked.

The next room has a Save Point, and lots of dead Rebel Reploids. Oh yeah, *definitely* Zero's handiwork. Take them up for more carnage. Among the bodies is a **deactivated Killer Mantis** for your Deployment Center. One of the corpses has a **Fire Guard** and another has an **Ice Missile Sub-Weapon**. Both of these weapons should prove valuable in the upcoming fight.

Grab the **Build Shield**, **Hunter Missile** and **Build Armor** in the computer room before taking to the only unlocked door to the west. Take the lift up, and the Hunters are back in action, together again!

At this point, Zero is back in your party. He's raised his levels considerably and now owns the Z Saber+ Weapon, but plays the same as before. He brings a pair of Heat Haze Sub-Weapons to the party, no Force Metals. Re-equip him as you see fit and get to

Do *not* skip the **Build Power** and **Backup** items waiting in the room where Zero rejoins; they're easy to miss since they're behind the camera when you regain control. The door to the next room that you passed before is now unlocked. The **Gain Hyper** and two **Tank Energy 100** generators are there. Make sure your entire party is ready before you move on because Jentler's just ahead.

BOSS ALERT

MACH JENTLER

LIFE ENERGY 28000

POWER 98

ARMOR 50

SHIELD 70

SPEED 40

DAMAGE %

FIRE	WATER	THUNDER
ABSORB	150	100

Unlike other bosses so far, Jentler's backed up by Preon units, making him quite annoying. Destroy a Preon, and Jentler calls another to take its place, but it does eat up a turn he'd otherwise use

with a flame attack. On the other hand, if you've equipped some good defensive Force Metals, it might be worth ignoring the Preons and focusing on Jentler. He's weak to Water attacks, so have X's Ice Buster handy, as well as some Ice Missiles. Equip Fire Guard Force Metals in everyone as well to drop the damage taken. Axl's DNA Change into Silver Horn can do some real damage, so try to get that in as often as possible. If you have Ultra Blizzards, use them! Marino in Hyper Mode is good for really laying on the Blizzards, especially if you use a Gain Hyper to keep her Quicksilver going. Her Hawkeye also ensures she'll hit him with her normal attacks, which combined with an Ice Missile can slice off about a thousand points each turn.

When he's in the air, Jentler's good at dodging. But a powerful enough series of attacks can temporarily ground him, leaving him very open. Once he's down, sic your melee fighters on him in Hyper Mode! Watch out though, Jentler regains his balance once his turn comes up, and he doesn't miss an attack. Speed is your friend here, especially since his attacks do massive damage and you want to be able to get your SubTank use in. Once he's down, his Preon peons are automatically vanquished, and you're up **25 SubTank Points**, a complete **SubTank**, the **Fire Buster MkII** for X, plus Jentler's DNA to enhance Axl's DNA Change attack!

Whoops, you're not done yet! Jentler may be roast squab now, but now there's Preon units pouring out of Duboar. Yet another fight, and this one's a marathon battle!

Each time you wipe out a squad of four Preons, another quartet appears, tougher than the last. The Preon Hybrids are the tough ones; the fourth and final round pits you against four of them at once.

Without an elemental weakness, you need a little more oomph to take them down. X's

Hyper Mode should be stored up (since using it against Jentler is a bad idea), so open up with it! The combo of Power Charge, Shell Buster and his normal attack should be enough to activate the Final Strike on even a Hybrid at full health.

Once the fourth round is over, Axl saves the Hunters' with his shape-changing abilities. With Duboar destroyed, the factory is out of commission.

Mission accomplished!

THE MEANING OF FRIENDSHIP

BOSS: INCENTAS

NEW ENEMIES

ENEMY	LE
> Batfighter	600
> Liquid Glob	1500
> Mettaur Counter	3200
> Mettaurcure	2800
> Plasma Glob	3000
> Rush Loader	2000
> Silver Mettaur	3300

Zero has issues. He leaves the party pretty much immediately, insulting all of X's new buddies. Paranoid? Another communication with Redips points the Resistance to a new Rebellion base, but Nana needs a few minutes to sort through the data. You can't use any of the base's functions while she's compiling, so step outside for a little conversation with Spider.

After your chat, return to Nana. She now has the data ready to start the next mission. Make your preparations (Deployment Center and weapon shopping), then hit the Gimialla Mine!

The mines are crawling with Mettaurs, so physical attacks are the best way deal with them. Axl's Mettaur Crash weapon does heavy damage to these foes, but really only when they're not tucked under their helmets, so its effectiveness can be limited. Have your Combat unit knock the Mettaur over and use Axl to follow up.

The figure vending machine in South Square has changed stock, switching over to a new series of figures. Don't worry if you haven't gotten all the old ones yet, though. There's a new vending machine in East Square, next to the Save Point, and it has all the old series figures you haven't collected yet.

Get the **Ultra Fire**, **Ultra Thunder**, and **Ultra Blizzard** items from the gems in the first room, giving you an indication of what to look forward to. Make use of the Save Point, and continue east to the lift, then to "Basement 2".

When going up against a Silver Mettaur, focus on destroying it, but also try hard to steal from it. You can steal the Ace of Diamonds Weapon for Spider from it and there's also a slight chance that it drops the Beat Miracle Weapon for Marino when destroyed. It's weak against Thunder attacks, so shock him! These items make good selling fodder if you manage to steal several.

Once in Level 2's main room, grab **1200 Zenny**, an **Anti-Lock** and the **DOA Protection Force Metal**, which reduces a character's vulnerability to instant-kill attacks. When you go south there are two **Figure Tokens** to be had as well.

There are four doorways on this level, each one is a dead-end, but each one also has prizes.

Go to L2 southwest first. The southern hall has a trio of Rush Loaders hiding inside a closet. Be careful when fighting them; if you destroy one of them and another gets in an attack, it will be enraged and perform a powerful suicide move against one member of your party. Spread out your attacks to weaken them evenly, so you can take them out quickly one, two, three, or all at once with a spread attack. Once they're down, X gets the **Booster Parts**, giving his dash the power to smash open rocks!

The rocks you just passed block off a **Mini Motor** that's sure to start up a deactivated Mechaniloid somewhere! Head to the Southeast Division, which has the **Ace of Spades** for Spider, and a **Figure Token** behind some boulders. Use the Save point in the northern section of the Main Hall, then hit the Northwest Division for three **Figure Tokens** and a **deactivated Bat Bone** for the Deployment Center.

Smash the boulders at the north end of the Main Hall to reach a control panel that adds another floor to the elevator's destination lift. Then take on the Northeast Division for **800 FME**, a **Build LE**, **Tank Parts**, and a **deactivated Mega Mantor** that will run thanks to your Mini Battery!

Take the elevator down to Level 3, and grab the **Tank Energy 100** if you need it. Because on the other side of the door is an unpleasant reunion.

Now that you have enough active Mechaniloids for three search teams, consider using the Save Point to return to the base and check on your deployed units, and send more out.

BOSS ALERT

SHADOW

LIFE ENERGY	18000
POWER	112
ARMOR	62
SHIELD	73
SPEED	78
DAMAGE %	
FIRE	100
WATER	100
THUNDER	100

Powered by Supra-Force Metal, Shadow's more than ready to send his former comrade to the scrap heap. When he charges up his cannon, hit him *hard*, preferably with Hyper Modes, in order to knock him down and dissipate the charge before he can unleash it.

Be careful though, as his Code Breaker move can do some real hefty damage.

Once his HP has been depleted, another special guest appears; Zero is back! And now it's time for round two, with Zero put into the attacking lineup... though switching him out for the character he replaced is a good idea, since he's not very well-equipped right now. This time, Shadow has 28000 LE, but the strategy is the same as before; bash him good with Hyper Modes when he charges his Pulverizer Cannon. Try to steal from him, as he's got a Build Armor and Build Shield as well. Once he's down, you're up a **Figure Token** and the **Z Ichimonji** for Zero.

If you haven't already, use the Save Point to return to base and buy Element-based weapons for Zero. Since the level is heavy on the Globbs, having two party members strong against two different Elements is a good plan. Fire and Ice should be the Element choices for weapons, since the Liquid Glob freezes when hit with an ice attack.

Head south and grab the two **Figure Tokens**, then talk to the mining Mechaniloid. Seems he's malfunctioning, but there's not much to be done right now. The door west won't open without the Gimialla Key, so return north. There's a Save Point up there, valuable indeed. Through the door to the north, a miner Reploid needs Electric Components to fix the elevator control panel, and hands you a **Red Pickaxe**. The Mechaniloid that owns that Pickaxe has the Components you need.

Seek out the red Mechaniloid in the Northwest Division, and trade the red Pickaxe for the **Yellow Pickaxe**. This also nets you the **Electric Components** you need, but the other Mechaniloids are also malfunctioning. You're a nice guy, so help them out! Grab the **Figure Token** behind the red Mechaniloid, then take the north door to the **Ace of Hearts**, and a **deactivated Degraver** for the Deployment Center.

Trade in your Yellow Pickaxe for the yellow Mechaniloid's **Blue Pickaxe**. Grab the **1300 Zenny** in the door to the south, then return to the Main Tunnel. Give the miner Reploid the Components to fix the elevator, and then return to the blue Mechaniloid in the southern Main Tunnel. Yep, he needs the Blue Pickaxe, and gives you the **Green Pickaxe** in exchange.

Finally, head to the Northeast Division and hand over the Green Pickaxe to the green miner. You now own a **White Pickaxe** and a **Trade Sheet**. Grab the **Force Missiles** in the room behind the Mechaniloid, then return to the miner Reploid. Now that you have the Trade Sheet, he knows what's been going wrong, and in exchange gives you the **Infinite Resist Force Metal**. Go for the elevator to Level 4.

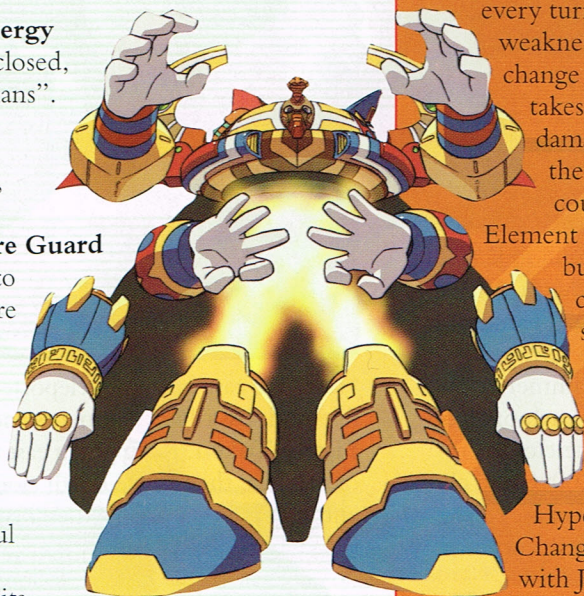

The main room of Level 4 has a load of goodies. A Save Point, **Build Power**, **Build Shield**, **Build Speed**, **Build WE**, and **Build Armor**.

Head south for a **Gain Hyper** and **Tank Energy 100**. The southern door is closed, and the key is "three guardians". Let's go guardian hunting!

Take the western door first, which has a **Water Guard**, **Thunder Guard**, and a **Fire Guard** inside. Hop across the hall to the eastern door, and prepare to fight. Each of the three rooms has a Glob enemy inside, one for each Element. Open the door, then equip your party as needed to handle the Glob type ahead of you. Be careful though. The Plasma Glob guardian has a Fire Glob in its combat party, the Fire Glob guardian has a Liquid Glob, and of course the Liquid Glob guardian has a Plasma Glob. Make sure you've accounted for the second element.

With the three guardians down, the door is opened. Return to the Save Point and save the game. The boss is just behind the door!

Are self-destruction measures standard issue? Incentas sets the base to blow, leaving the Hunters trapped... but Spider finds a way out, at the cost of his own life. He is our hero. Awwwwwwwww.

BOSS ALERT

POWER 180

ARMOR 70

SHIELD 70

SPEED 100

DAMAGE %

FIRE	WATER	THUNDER
VARIABLE	VARIABLE	VARIABLE

Since Incentas changes his Elemental state every turn, his weaknesses change too. He takes double damage from the proper counter-Element attack,

but timing can prove difficult. X and Zero can cover all three Elements by themselves; X's Hyper Mode takes care of Fire, then simply deck him out with the Ice or Thunder Buster, and have Zero equip the remaining Element Saber.

Don't forget to have X Cooldown from Hyper Mode when needed. Axl's DNA Change now has all three Elements covered with Jango (Thunder), Horn (Water) and Jentler (Fire),

making him a good third character. Have him simply charge up his WE and use SubTanks when necessary while X and Zero whale on Incentas, using their Action Triggers when available.

Give everyone a triple-dose of Element Guard Force Metals for extra measure. Really, this fight is a lot less daunting than it seems at first. Once Incentas has been snuffed out, the **Twin Ice** and **Twin Thunder** Sub-Weapons are yours along with his DNA for Axl.

BOSS: BOTOS

NEW ENEMIES

ENEMY	LE	ENEMY	LE
> Bigbit	1200	> Preon 5 Botos	4000
> D-Rex	8000	> Preon 5 Ferham	4800
> Gold Blader	1000	> Triclaw Killer	5400
> Gold Mettaur	4400	> Wild Dog	2400
> Mega Tortoise	6000		
> Meltdown	26000		

Nana and Gaudile have tracked down a Rebellion jamming station, right in the middle of the Vanallia Desert. Visibility is next to nil, which can leave you lost easily. Thankfully, Nana sets you down by a jammer, your clue to finding the station. Check out the power cable by the jammer, and move in the direction it points to. Examine each one you come across to determine its power level; the closer to

100%, the closer you are to the base entrance.

From the 20% jammer, look south. There's a broken-down Mechaniloid a little bit away that holds a **Figure**

Token. Follow the cables until you find the 40% jammer, then head west. There's another busted Mechaniloid that way, this one carrying a **Mini Battery**. From there, keep going west, and you soon hit an invisible wall on the edge of the area. Slide along it northward to find a **deactivated Mega Tortoise** that needs the Mini Battery that you just found in order to work! One more Deployment Center Mechaniloid! From here, you can return to the teleporter by moving south against the wall. Do so to re-gain your bearings. Be sure to check out every transmitter you see.

MELTDOWN!

Watch out for Meltdown! This massive Mechaniloid shows up there and soaks up abuse, but is on an internal timer. Once the timer's down, Meltdown melts down, doing 9999 damage to your entire party. Turn on the Hyper Modes and pour it on him fast!

Head due east from the teleporter, and stick close to the invisible wall. By a 15% jammer is another Mechaniloid with a **Figure Token**. Keep going east until you hit the eastern edge of the area, then move north along the barrier. The base entrance is in the far northeast corner of the area, visible through the sandstorm by a bright light. When you reach it, do *not* examine it. Instead, follow the invisible wall, then turn to the west. Another broken Mechaniloid holds the **Doubletooth Weapon** for Zero, which should be equipped right away. Return to the teleporter via the walls, and return to base to restore your power if needed.

Follow the power cables once again to the 40% jammer, then move northeast to find another Mechaniloid, which has one last **Figure Token** on it. From there, look around for the base's entrance light, and head for it. But once again, *don't* examine it. From the entrance, head south a bit to find a jammer at 55%. At that point, follow the cables southeast. There's one more Mechaniloid, this one is carrying **Tank Parts**. Now return to the entrance and examine

Unfortunately, the door won't open. There's another jammer right by it at 100%. Follow the power cable's direction, and soon X and Zero are reunited with one of the Rebellion's Triumvirate; the whip-wielding Ferham. She loves to use this weapon, especially when her playmates are sliding into quicksand.

The party awakens deep underneath the desert, inside the South Side of the Rebellion Base. Right next to a Save Point too, how convenient! Make use of the save, and take the western door. Grab the **Tank Energy 50** in the hallway, and head north to grab a **Vaccine Program**. Further down that hallway is a big shiny red button that should of course be pressed at the first opportunity.

Backtrack and head west through the door. There's another door to the west, but a laser beam blocks it. The blue switch that unlocks this door is just around the corner. Hit the button and return to claim a **Build Shield, Build Speed, Build Armor, and Build Power**. In the corner is a liquid less Liquid Glob that can be reactivated once you have some Cyber Liquid. Leave the room and head north.

There's a **Cooler** just past the door. Turn to the south to find the second red candy-like button. After pressing this button it leaves only one left to open that door, wherever it is. The alcoves to the northwest each have a button, one yellow, and one red. Press them both, then take the door to the North Side.

The door to the west is still blocked by a yellow beam, so you have to come back later. Grab the **Cure All** along the hallway to the east, then take the turn south for a **Build Hyper**, and the second yellow button. There's only **800 FME** behind the door though, so skip it if you're in a hurry, and head to the eastern portion.

There's **3800 Zenny** in a small room to the east, but the real prize there is the **Ball & Chain Hammer**. With this, the deactivated Einhammer back in the Ulfat Factory can be made operable and sent to your Deployment Center. Take the twisty path south to reach an elevator room with a Save Point. Save and head to Floor 1F.

The Central Passageway is a large series of corridors, interlinked with the Array Control Room. Start by going south, grabbing the **Gain Hyper** and **Energy 100**. Step through the doorway to a small hall that leads to the sun entrance that wouldn't open previously. It's open now, if you really feel like wading through the sandstorm some more. Once back in the elevator room west, then north because all of the other doors in the area are locked.

The green lasers look intimidating, but they're high enough to where you can slip right under them. Grab the two **Figure Tokens** first, then check out the reflectors in the southwest corner. Change the laser's direction to send power to the circuit in the wall. Something is happening on the level above, go check it out.

Once on the second floor, head north first, grab the two **Figure Tokens** in the northern hall, then go west to the only unlocked room. There's the **Thunder Stella Weapon** for Marino in the gem, this is a throwing star that strikes every enemy unit. Check out the panel to the west, and flip the switch to turn off the jammer. There's also the sound of doors unlocking. Exit the room through the southern doorway, grabbing the **Figure Token** in the hall before returning to the elevator and Floor 1.

Check your map as soon as you are back on Floor 1; all the doors are now unlocked. Of course, check out every room. The southwest room has a **Tank Engine** 50 plus a **deactivated Pararoid** for your Deployment Center. It won't run without a Mini Motor, but thank you've got one of those!

The laser array in the southwest room is like before; you need to arrange the reflectors to send the beam of energy into the receiver in the northeast corner of the room, which unlocks the door to the room directly above. Be very careful though... if the laser hits the gold Rebellion symbol on the wall, you're thrown into a fight! Before you go though, re-arrange the reflectors so the laser ends up striking the second green panel on the same wall as it comes from. If you don't, the items in the room directly above will be shielded by force fields!

Now head to the southeast room, which has the **Cyber Liquid** you need for the deactivated Liquid Glob down one level, but finish your business on this floor before backtracking. Just switch the reflector in the southwest corner to unlock the room above. Once the lock has power, change the beam's path to strike the northwest green panel.

The northeast room is last on the list. Grab the two **Figure Tokens**, then study the laser pattern. It's a lot more complicated than the others. Work your way backwards from the activation panel; change the reflector in the northwest corner first, then the one in the dead center, sending the beam into the lock panel. From there, shift the beam so it first hits the panel in the southeast corner of the room, and then again to the northeast panel, opening up both items above. Now that your business on the first floor is finished, return to the elevator and backtrack to grab the **deactivated Liquid Glob** back in the basement's South Side. Once you have your Glob, return to the second floor.

Back on Floor 2, hit the southwest room. Get the **Combat Absorber** and **Fire Resist Force Metal** there, then use the control panel to deactivate some of the jammer equipment. Go to the southeast room, grabbing the **Figure Token** on the way. Take the **Shot Absorber**, then hit the jammer panel. And finally, the northeast room's panel awaits deactivation. You should also take the **Build WE** and **Build LE** that reside here.

Once the jamming equipment is shut down, Botos does you a favor and adds one more destination to the elevator, the third floor where he waits. Take the elevator back down to the Save Point, save your progress, and get ready for a fight!

BOSS ALERT

BOTOS

LIFE ENERGY 40000

POWER 122

ARMOR 70

SHIELD 65

SPEED 80

DAMAGE %

FIRE	WATER	THUNDER
50	150	100

Botos' first move is to summon a pair of 2000-LE Q-Bits to the fight. Since they like using Mega Fire attacks, make sure your party members have Fire Guards installed. Like fighting Dr. Psyche, getting rid of the secondary enemies here is the key, especially since the Q-Bits are incredibly fast. With them down, Botos is forced to waste his turn summoning more. However, he's got decent speed, which means he's more likely to get his turn in while Q-Bits are still on the field. A failed entertainer, Botos uses his voice as a weapon, often striking all your teammates at once with Sonic Booms or Laser Shows.

Take advantage of his water weakness, loading up X and Zero with Ice-based weapons. If you have the Generator Sub-Weapon, give it to X so his Charge Shot is ready even faster, and use it at every opportunity. A

Gain WE +5 Force Metal is also a good addition. The Charge Shot at this level does enough damage to initiate the Final Strike against both Q-Bits if it doesn't destroy them outright, which restores some of X's WE... which is then funneled into the next Charge Shot, a perfect cycle. This way, X can let loose an 80% or more Charge Shot every turn.

Marino's completes the trio pretty well. Thunder Stella is not a bad choice of Weapon for her, since it hits all targets, finishing off the Q-Bits if the Charge Shot doesn't do it. Use her "I'll Take That!" Action Trigger to steal a **Super Absorber** and a **Resist Fire**. Don't bother trying to steal from the Q-Bits, they have nothing. Once Marino's relieved Botos of his stuff, have her focus on pummeling the big boy and making good use of SubTanks. Give this guy the gong, and you gain the **Twin Fire** and **Fire Stella**.

THE ULTIMATE WEAPON

BOSS: FERHAM

NEW ENEMIES

ENEMY	LE	ENEMY	LE
> Bladey	1600	> Preon Gunner V2	4000

> Giftbox	700	> Wolfloid	3600
> Gun Bit	3200	> Zwei Hammer	8000
> Preon Doc	4000		

Botos is a lousy actor, and the Supra-Force Metal he “gave up” could very well lead to a trap. But, the Melda Ore Mine is the only lead the Rebellion has now, so off you go. This snowy region with several Water-based opponents, so pack in some Thunder weapons before you explore too far.

The Ore Plant External Tank has some nice items within it.

Along the north wall is a **Heavy Motor** that can start up a busted Mechaniloid somewhere, and **Tank Parts**. Grab the two

Figure Tokens along the east wall, and take the doorway east. Once inside, grab the **Ultra Thunder** from the gem. The eastern door is locked, and won't open without the Melda Key... which you can't get until you complete the area and send Mechaniloids in from the Deployment Center. There isn't a whole lot to do here except take the elevator.

Area E-B02 is fairly simple. Zero and X spy something in the peephole in the center of the room, and wants shots from a few more angles. Take the southern fork first, making sure to snag the **Build LE** right next to the door in the northeast corner of the room. Head to the next room, grab the **Fi Token**, and check out the peephole there to see another image to Gaudile.

Now head back and take the north fork and pick up the **Build LE** in the corner. There's an elevator in the room, but don't take it until you've checked the peephole along the southern wall. That's a pretty big... something.

The elevator leads down to Area E-B03, which has the same layout as E-B02. Check the peephole in the elevator room, and head on. Grab the **Mini Battery** in the red gem, this can be used to activate a busted Mechaniloid somewhere. Enter the fork-room, and check out the peephole on the western wall. Gaudile's closer to identifying it, but needs a shot from the left.

Before you head that way, take the door to the east. There's a **Build Shield** at the very end of the passage. Backtrack, then go south to pick up the **800 FME** gem. Take a peek through the hole in the northern wall. What's inside is looking uglier and uglier, and Gaudile demands more shots.

Once you've taken the elevator to Area E-B04, check the peephole to the north for another shot, then head to the central room. There is a **Tank Energy 50** here and another peephole are waiting for you.

Gaudile only needs one more shot from the right, so you know where to go. Head north!

There's a **deactivated Wolfloid** in the passageway, another new member for you Deployment Force. When you step into the western room, Gaudile finally realizes just what's going on... a Supra-Force Metal missile that will create millions of Mavericks! Once Gaudile's made this horrifying discovery, grab the **Figure Token** in the room, then check out the control panel. This unlocks the doorway to the east, so head there now. There's nowhere to go but down.

Finally, a Save Point. Take this opportunity to save, as a familiar fat face is just around the corner, and he's got one of the keys you need to deactivate the Supra-Force Metal warhead.

BOSS ALERT

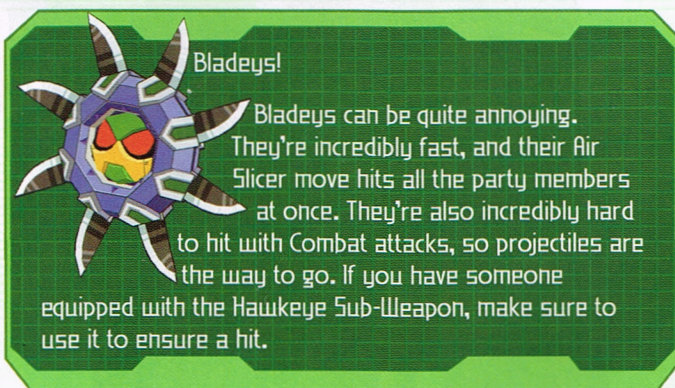

BOTOS

LIFE ENERGY	3
POWER	66
ARMOR	44
SHIELD	47
SPEED	32
DAMAGE %	
FIRE	50
WATER	150
THUNDER	100

Wait, wait, wait, *whoah now*. One hit? One lousy hit? That's all it takes?

Botos books it; he's clearly playing with you. Nothing more to do but give chase. The Missile Silo Base Lower Section has four blue item gems, containing a **Build Hyper**, **1000 FME**, **Figure Token**, and **3000 Zenny**.

Once in Area W-B03 above, Botos pulls the fake trick again. The fake goes west, Botos goes north, and the results are the same as the floor below. Make your choice, then claim the items left over from whichever path you didn't take. The western path has a **Build Armor**, the northern path a **Cryogenic** and **2000 Zenny**, and there is a Save Point just before the elevator up.

50

In central Area W-B02, Botos runs behind a door. Grab the **Gain Hyper** and **Tank Energy 100**, and get ready for a fight. Take the eastern door, where the entendre-slinging Ferham awaits.

Keep going west to get a **Build Speed**, and head to the elevator upwards. Once you are on the other side of floor 50, there's a Save Point waiting for you. Save and move east where Botos is waiting again. This time, he creates a decoy and each Botos heads for an opposite room. The Decoy is the one that took the northern room.

You now have a choice to make. If you follow the fake Botos north, you'll have a tough fight ahead. It's not a tough fight because the decoy only has 12000 HP and can only summon a Bigbit for support. It does automatically drop a **Sub-Weapon** when destroyed, but you can get that from other enemies. If you go south first, you go up against the real deal. The fight looks bad at first, with uninterrupted Botos attacks... but he runs away, leaving a pair of Q-Bits for you to deal with.

Once you've gone after your Botos choice, stick around the floor to claim treasures on the opposite side. The northern fork has a **Figure Token** in the final room, while the southern path has **Tank Energy 50** and a **Build Power** way to the elevator.

BOSS ALERT

FERHAM

LIFE ENERGY 50000

POWER 140

ARMOR 84

SHIELD 74

SPEED 116

DAMAGE %

FIRE
100WATER
50THUNDER
150

Ferham's greatest assets are her speed and the fact that she can fly. Because she's airborne, physical attacks have a very high chance of

missing her unless you equip your melee fighters with Hawkeye Sub-Weapons. Her Crimson Shade ups her dodge percentage, but a solid strike can dissipate it, forcing her to waste a turn restoring the Shade. She uses Blizzard attacks often, so have some Water-protection Force Metal installed in everyone.

Use Ferham's Thunder weakness against her by loading down your party with Thunder-Element weapons. She screams pretty loudly when thwacked with them. Once again, Marino proves to be a valuable backup to X and Zero, thanks to the Thunder Stella and her "I'll Take That!" Action Trigger. Be sure to steal from Ferham, as she carries a valuable **Build Hyper**, giving your character of choice one more round of Hyper Power. Once she's loot less, switch to Marino's Quicksilver mode and have her use a steady string of Thunder-type missile attacks and the Thunder Stella. Keep feeding her Gain Hypers, and Marino will have a near-uninterrupted string of attacks! Once she's down, Ferham gives up the **Ice Stella** and **Heat Haze**.

Only after Ferham falls to the depths of the silo do the Hunters remember that she has one of the warhead keys, so it's time to trek all the way back down to the base of the silo. If you're in a hurry, the Exodus Force Metal can really speed things up. Be sure to save on the way!

Once back at the base of the silo, find Ferham's body. She doesn't have the key anymore because good old Botos ripped it from her body. Time to go back up to Area W-B02. Once you're there, take the door to the south to claim a **Figure Token**. Take the western door and the elevator inside, and continue forward to find that Botos is no longer.

Once you return to base, use the Arcade Teleporter to return to this point. Pick up the **Gatling Buster II** for X, and continue east into a small room containing a valuable **Generator Sub-Weapon**!

WHEN GIANTS DUEL

BOSS: SCARFACE AND EPSILON

BOSS ALERT

SCARFACE

LIFE ENERGY 37500

POWER 142

ARMOR 80

SHIELD 85

SPEED 70

DAMAGE %

FIRE	WATER	THUNDER
150	100	ABSORB

Scarface plays a power game, and has a trick similar to the Mettaur Counters'; if you hit him with a Combat (melee) or Shot (projectile) attack, he defends against that same type of attack for your next character's turn, plus he has a higher chance of using a Counter against you. Alternate between Combat and Shot attacks every turn, otherwise your attacks will do minimal damage regardless of their Element. X and Marino can cover both forms of attack, while Zero handles the heavy melee attacks, all three with Element-based weapons. Scarface can also heal himself with the Electro Breaker move by sapping energy from all your party members, prolonging the fight.

Botos couldn't take Water, Ferham was weak to Thunder, so it stands that Scarface takes extra damage from Fire. If you haven't changed your weapons since your fight with Ferham, you're up the creek, since Thunder attacks *heal* him. Naturally, your party members should have Thunder Guards equipped as well because his special moves are all high-powered Thunder attacks. Thankfully, X's Hyper Mode is Fire-based, giving him extra oomph in either attack style... just be sure to Cooldown if needed. Again, be sure to steal from him because he has a **Thunder Resist Force Metal**, which is quite handy later on. Once he's down, he gives up a **Tank Energy Infinite** recharge and the **Shock Lance Beta**.

NEW ENEMIES

ENEMY	LE
➤ Preon 5 Epsilon	5400
➤ Preon 5 Face	6000

Looks like the Rebellion is going on the offensive, attacking Central Tower! Until you take care of this problem, you can't make use of any of the Base's operations. Change your weapons to Fire-based attacks and equip items that give your party a defense against Thunder, then get on the Air Bus to South Square. Scarface, Epsilon's second in command, is waiting for you.

Check Key Item(s)

Electric Components	28	ME	

Unlocks a door leading to a hidden area somewhere in Lagrano Ruins.

Once Scarface makes his retreat, you're free to go shopping in the Arcade again. Be sure to get the Preon Killer weapon for Axl, it's a valuable weapon to have. Return to Nar when you're ready. She's been tracking Scarface's movements, and believes that he is now at the Glacier, a Re test-field that might be the Rebellion headquarters. The Base functions are open to you again, so check your Deployment Center activities, and your equipment. The final trials are coming up ahead, and you're going to need all of your resources.

On that note, by this point, diligent use of the Deployment Center should have given you several keys; the Lagrano Key, Tianna Key, Gimiella Key, and soon the Melda Key. Each one opens up a new section in these levels, and leads your team to new items. These prizes can be valuable additions to your arsenal, and make the fights ahead easier.

These extra areas are entirely optional, and are not required to complete the game. But you want a complete set of everything, right?

The Lagrano Key opens the door Area 4F East of the Lagrano Ruins. The stairway it leads to has **Tank Parts**, two **Figure Tokens**, and a **deacti-**

vated Deerball for your Deployment Center. Continue to the room above, and say hi to three girls you haven't seen in while. Saffron, Cumin, and Jasmine have new shops with new items! Cumin's weapons shop in particular has some valuable (and expensive) goods.

The Gimialla Key opens up the locked door on Level 3 of the Gimialla Mine. There are two **Figure Tokens** here, but a large **deactivated Gold Blader** is blocking the path. Unless you have a Heavy Motor item, there's nothing to be done... but wait! You *do* have one! Once it's back at the Deployment Center, grab the **Tank Parts** in the room behind it and head for home.

The Melda Key opens the door in Melda's B1 Entrance Hall. There are three **Figure Tokens** in the room immediately past the door, get them and take the elevator up. There's a **deactivated Meltdown** there, grab it. Be ready when you head to the next room with a defense against Fire and an offense based around Water; there's another Reploid here guarding a valuable prize!

BOSS ALERT

DUCKBILL MOLE

LIFE ENERGY 58000

POWER 155

ARMOR 65

SHIELD 75

SPEED 80

DAMAGE %

FIRE	WATER	THUNDER
ABSORB	150	100

Sadly, there's actually two Duckbill Moles to take care of. They use mostly Fire based attacks, so be sure to load up of Fire Reverses, Resists, and Guards, but remember that you can't go lower than 25% damage without a Reverse. The Kamikaze Drill attack does both nasty damage and reduces your characters' Armor. Duckbill Mole also likes to use Mega Fire to heal. The self-inflicted Mega Fire also charges them up and enables more deadly moves.

Naturally, cold attacks are the way to go. Duckbill Mole doesn't like cold, and being hit with one of these attacks knocks him out of his fired-up mode. This causes it to heal with a Mega Fire rather than attack. Equip Generators and Power Charge Sub-Weapons in your active members. Also, avoid using X's Action Trigger attack (you want to nail both Moles with Water attacks rapidly to prevent them from releasing their charged-up Fire energy), since it only slows you down. Zero's Hyper Mode/Action Trigger combo, however, is recommended for taking them out. You can steal a **Fire Resist** from each one, so be sure to do so. Once you're buried the Moles, they cough up two **Figure Tokens** and two **Power Charges**.

54

ABSOLUTE ZERO

Absolute Zero is a second (and much more devastating and rather Bass-like) Hyper Mode for Zero. As befitting its name, Hyper Mode's attacks are all Water/ice based. Zero's LE, SP, and WE Gain each get a 50% boost, and his Power is doubled in this mode. His Sub-Weapons become close-range strikes of phenomenal power. Like the Ultimate Armor, Absolute Zero gives Hunter a new Action Trigger, the Calamitous Arts. The input commands are simple; just hit the correct direction/button pairing the display shows them. The more you get within the time limit, the more attacks Zero uses. In this mode, Zero can do damage in the tens of thousands, making him a prime choice against the upcoming bosses!

With the Duckbill Moles gone, you're now free to claim the contents of the red gem; **Absolute Zero!**

Parts as well as a **deactivated Radar Killer**. The southern path has some incredibly valuable items inside... but it's guarded by a *very* powerful Reploid who's quite miffed you've interrupted her practice. Prepare to face the wrath of Super Idol Raffelsian, the reason why you should take the area last!

Finally, the Tianna Key used on the locked door within the camp's Main Area 1. Take the northern path first, to claim more **Tank**

POWER 145

ARMOR 60

SHIELD 60

SPEED 110

DAMAGE %

FIRE	WATER	THUNDER
100	100	100

Rafflesian by herself is bad enough; she restores a large amount of LE every turn, her Sunburst attack strikes the entire party numerous times, she gets slightly stronger every round, plus she's pretty fast to boot. But she also has backup, a pair of Belladonnas whose powers practically make them bosses themselves! They too have incredible regenerative abilities, plus they gain power each time they're attacked, which they focus into their Bold Beam moves. All three have powerful Water and Thunder attacks, so make sure everyone has a full complement of Force Metals to guard against them, especially Resist and Reverse types. Use Neutralizer Force Metals if needed, as you want as much *defense* as possible. While they won't save you from the Sunburst, they can keep your HP up so you're a little more prepared for it.

Hyper Modes are the way to win this fight, *especially* Marino's Hyper Mode. Have a full supply of Gain Hypers ready (you are *going* to need several), switch everyone to their Hyper Modes on their first move, and focus all your attacks on Rafflesian. Do *not* use spread-shot attacks; focus on each enemy one at a time to keep the others from gaining power when they eventually get their turn in. Use X and Zero's Action Triggers as soon as possible, as even at 50%-75% their moves do considerable damage, especially Zero's Calamitous Arts.

Marino use her Hyper Dive whenever you feel lucky at the slots, though she can also assist with Boost Powers for her teammates' eventual attacks. If you're feeling lucky, have Marino steal from Rafflesian to claim a **Force Tomahawk** and a **Build LE**. Use a Gain Hyper every time a character gets down to their last Hyper Round to keep them in there and make the most of their enhanced abilities.

Ignore the Belladonnas until after Rafflesian is down; they're a relatively minor threat if you don't feed their attacks. Each one has a **Force Missiles** and **Build Speed** to steal, do so if you have plenty of Gain Hypers left. Even with all this, you'd best have a full complement of SubTanks, Reboots and Backups ready to go; Rafflesian can still do some hefty damage, plus a lucky shot from a Belladonna once you start on them can wipe out a party member in a single hit! Once the trio is down, you earn a **Figure Token**, **Tank Parts**, two **Turbo Clocks**, two **Resists**, plus Axl gains Rafflesian's DNA for his Hyper Mode!

With Raffelsian out of the way, you're now free to collect the item gems behind her. Two **Figure Tokens** are nice, but the *real* prize is the **Ultimate Armor Hyper Mode** for X!

Once you've picked up your preferred equipment, talk to Nana and head for the Rebellion Base. It's time to end this!

ULTIMATE ARMOR HYPER MODE

Quite possibly the most impressive-looking piece of armor X has donned in his long career, and certainly the largest, the Ultimate Armor is all about raw firepower. X's Power is doubled while in this form, and his Sub-Weapons become high-powered shot attacks. But the real highlight is his Action Trigger, the devastating Nova Strike. Using it when activated is just the same as using the Final Strike; mash buttons! Switch between targets with the joystick, and blast your opponents to little tiny bits. The more WE you have when activating the move, the more time you have to spray ammunition.

There's a Save Point right inside the Grave Base's entrance, be sure to use it. The doorway to the north is blocked off, forcing you to go west. Once through the doorway, you're locked in, with no choice but to go forward, right into a security system. Destroy the Preon guards, and the pathway is opened... briefly. Dash through the doorway before the beam turns red again, or else you must fight again to re-open the door.

There are several doors throughout this area, but some of them do not open under any circumstances. Keep an eye on your radar map and the blue door-markers on the floor to tell which doors actually lead somewhere!

Within the Level E Security Zone, you must fight through both of the red security beams in order to open the door. Once you do open them, you have a choice to make. If you go north, there is a **Figure Token** and **5000 Zenny** in the dead end. If you go south, there is a **Figure Token** and **5000 Zenny** in the dead end. If you go west, they're behind more security beams. If you go east, having a incomplete set of action figures would be kind of lame, wouldn't it? North is the way you ultimately need to go.

In Level D, you have to open up three beams in order to unlock the doors. Start with the western beam and work your way to the eastern door; not only is there a **Figure Token** there, but it also unlocks the laser-gate back in the first section of the level. But there's a **deactivated Bladey** in the northeast corner of the room! Once you're done there, you have to re-open the three beams; do so and head all the way southwest to the **Beam Miracle S Weapon** for Marino. Make your way back to the now-unlocked gate and take the teleporter.

Take the **Tank Energy 100** right in front of you, and head into the big circle that is Level C. There are five doors, each one requires you to open three security beams. The northern door is the way you need to go; the other three are dead ends. Thanks to Axl's Preon Killer, the fights are considerably easier. The southwest room has a **Figure Token**, the northwest contains an **Unlock Limiter**, the northeast has a **Gain Hyper**, and southeast **3000 FME**. There's no time to get to your door of choice, so be speedy!

Level B has a **Backup** and **Cure All** sitting in the main hallway. There are only two security beams here, but they return to red very quickly, plus the Preon fights are much harder. The center door is the only one you should concern yourself with; the side-doors are dead-ends. As long as you get the door open before the beam goes red, you're good.

The only reason to enter the side-doors in this area is if you're playing the GameCube version of the game; each side has a Treasure Token. That's one more action figure for your collection!

At this point, you run up against Preon S Face units, who mercilessly *taunt you!!* While they're taunting you with the Damage Charge, they're heavily

shielded from projectile attacks, even Axl's Preon Killer. Whatever you do, do *not* attack them while they're taunting. Not only will your shot attacks do negligible damage, but every attack also adds power to their next move, which can kill one of your party members with a single blow!

Make use of the Save Point, and move forward to the rather grimly named Battle Field.

There's a load of items in the center of the room; a **Build Speed**, **Build LE**, **Build Hyper**, **Build Armor**, **Build WE**, and a **Build Shield**.

Move on to the teleporter, and grab the **Tank Energy 25** and **Tank Energy 50** inside the Revolver Shaft Area. As you enter the door at the end of the hall into the next room, take a note of the large "1". Go into the next room, and two columns appear and open up to reveal consoles. This is the Revolver Room proper, and the two consoles control which direction the room is facing. The left column moves the room three turns clockwise (plus), which puts you in room 4 on the first go. The right column moves the room two turns counter-clockwise (minus), putting you in room 7. There are eight rooms in all, but, only puts you on the path to the next area! If you want to get through quick simply use the left column twice, then the right column twice.

NEW ENEMIES

ROOM NUMBER	CONTENTS

> 8	Enemies

Once you've made it to room 3 and out of the Revolver Room, grab the **Tank Energy 50**, and take the teleporter up to the next level.

The Level S Top Security Zone has a Save Point, and a trio of powerful Preon S Epsilons to boot

on the other side of the door, guarding Epsilon's inner sanctum. Be sure to have Fire protection Force Metals installed. Even once you've taken care of them, the door is locked, leaving you no choice but to take the ramps up to the eastern and western wings of the area. The eastern wing has four **Figure Tokens** in a closet to the east, and at the end of the hall is a **Super Absorber** along with one of the door release panels. Backtrack and take the west wing, collecting the four **Figure Tokens** on that side of the room as well, and hitting the door release.

The Final Gate has two **Tank Energy 100** refills, and a **Gain Hyper**. You'd best be ready, as you've got a return match with Epsilon's #2 before facing the big boss man himself in a marathon boss battle.

BOSS ALERT

SCARFACE

He's got more HP, but he's a little weaker than before... plus by now you should be considerably stronger as well. The strategy is similar to the first time you faced him; plug in Thunder-resisting Force Metals, and alternate between Combat and Shot attacks to keep him from blocking. While it may initially seem counter-intuitive to not take an Element advantage, do *not* switch your party's weapons to Fire-based attacks before this fight. You do not have the opportunity to change them before taking on Epsilon... and besides, by now you should have weapons that do enough damage to mitigate the loss of an Element advantage. Sub-Weapons that compliment your main attack like Power Charge and Generator are much more useful here than missile-types. If you have Gain WE+ Force Metals, even better. Block when a character's attack type is being guarded against to build up power for an Action Trigger move. Unless you have a huge stockpile of Gain Hypers, though, save your Hyper Mode attacks. If you really need it, you can steal a **Tank Energy 100** from him. Once he's down, there's a slim chance he leaves a **Thunder Buster MkIII** or **Thunder Saber +**.

Scarface goes down, but you still have Epsilon to deal with. He won't run or back down, it's all or nothing!

With the Rebellion crushed and the Supra-Force metal in the Hunters' hands, all is well in Giga City. A transport is waiting at the main helipad, but that can wait! You still have access to all of Giga City's fine facilities, so make use of them while talking to the citizens and basking in their praise!

Once you take to doorway to the large heliport, there's no turning back for a little while! Make sure you have the equipment you want for the final battles ahead, especially a large amount of Zenney. Raising a few levels can't hurt either. You are given the opportunity to come back and claim anything you've missed in past areas after the battles, but it doesn't hurt to be prepared!

It's a double-cross! R loses his life, and the Hunters go on the run as Redips declares them all Maverick traitors. It's time to track down Redips and beat seven kinds of death out of him! Make use of the Save Point just ahead. Sadly, the game doesn't allow you to save, as the Central Tower is now under Redips' control and inaccessible. There's also the Giga City Salesman ahead, full of the old stock if you really want it. But there's another shopping opportunity ahead, so make use of your Zenney.

Once you reach the gate, the gate is shut behind you. Thankful that you're safe, plus the Saffron, and Jasmine back and have new. A complete high-power Element-based weapons is highly recommended, so be sure to get them. You can build up your Zenney in the hallway to the north, which has B Blader and Deerballs within. But once you step through the north gate at the end of the hall, your path back is once again blocked!

WILD JANGO

LIFE ENERGY 64500

POWER 250

ARMOR 160

SHIELD 140

SPEED 100

DAMAGE %

FIRE	WATER	THUNDER
150	100	ABSORB

It's the end of a *MegaMan* game, of course you're going to face old bosses again! But Jango's stats have risen considerably since your first encounter. By now you should have plenty of high-powered Thunder-resistant Force Metals, and much more powerful Fire Weapons. Go ahead and open up with Hyper Modes; you have the chance to restore them shortly. Don't expect this fight to be a pushover, though. His Rolling Assault can still do heavy damage despite your Elemental defense, and he gets in quite a few hits in rapid succession. He coughs up a **Build Power** upon destruction.

Remember to change your weapons back after the fight is needed. Take the elevator south, up to the Teleport Terminal. Turn west at the first intersection for an oasis. Inside is a nurse Reploid who heals your LE and refills your SubTanks and Hyper Mode turns, the General Merchant with all his stock, and a Save Point to boot! With free recovery, this area is an excellent place to hang around and gain levels for the challenges ahead!

B Bladers have been pestering X since his very first mission as a Maverick Hunter, but here they can actually be of great benefit. The B Blader's first move is to summon a pair of Deerballs to battle; ignore the B Blader and destroy its backup! If you smash them both before the Blader's next turn, it summons another pair. Just keep blasting the unlimited supply of Deerballs and gaining EXP. Hit them with a Get EXP + Sub-Weapon for an even larger reward. It takes time, but it's safe and easy.

Head to the far north end of the hallway and claim the **Tank Parts**, **Build Hyper**, and two **Figure Tokens** from the item gems. Study the purple laser curtains carefully, take note of the image that appears in each. There's a powerful boss lurking behind each one, and like Jango, they're more powerful than the last time you faced them! The doorway north will not open until all four bosses are cleared, so get to work. Naturally, return to the recovery room after each boss encounter for a full recharge.

Have your Water-resistant Force Metals installed; otherwise Silver Horn is going to wash you away. A Full complement of Thunder-based Weapons here is highly recommended.

Massimo has a bone to pick with Horn, and his

Shock Lance Beta gives him a lot of oomph.

On the downside, Massimo has very little room for Force Metals to resist the Water-based assault. Remember that Horn's Liquid Coating boosts his defense and adds to his blocking ability, prolonging the fight. Don't be shy about using your Hyper Modes, though Zero's Absolute Zero is not recommended. Horn drops a **Build Armor** when destroyed, valuable indeed.

It had to be Dr. Psyche's more powerful form, didn't it? There's no need for Element defenses here, but powerful

projectiles are a good

idea, as well as Force Metals that make you more resilient to status changes like Berserk. His laser attacks are just as deadly as they were before, so have someone ready to heal. Stay defensive to build up WE, and once the bulkhead opens and exposes his green core, switch to Hyper Mode and let loose with the Action Trigger attacks! Absolute Zero's melee attacks do have a tendency to miss, but the extra WE means more time and more chances, and he should still do considerably more damage than with the other attacks available to him. The Ultimate Armor's Nova Strike is all good, however. Once you've cracked his shell, Psyche leaves behind a **Build Shield**.

He of the shifting Element, it's a little hard to defend against all three Element attacks that he throws at you while timing the proper counter-element attack, especially since the full defense means giving up some of your nicer attack-enhancing Force Metals. Skip the counter-Element Weapons and focus on heavy-hitting null-element moves, like X's Ultimate Armor. Aren't you glad you picked those up? Have your third member heal with SubTanks if needed, and simply overpower him with null-element attacks. Be *very* careful not to use Zero's Calamitous Arts when Incentas is in his Water Element, that attack actually *heals* him. Wait until he shifts to Fire, then commence the pummeling. A **Build WE** is yours once he's out of the way.

With all four bosses deleted, the door to the north is unlocked. Restore your LE, SubTanks and Hypers, and head north. Take the elevator up to the Main Control Room, where the serpentine Hunter Depth Dragon awaits.

With a name like "Depth Dragoon", you'd think that he'd be Water-based and therefore weak to Thunder. You'd be wrong, and it's a mistake that can be fatal.

Thunder is his Element, and he flings it like nobody's business, so have your Thunder-resistant Force Metals equipped. But even then, Dragoon can be a real pain, as his Thunder Clap can force a character's next turn back several rounds! He's very big on using effect moves like Boost Power and Electromagnetic Field, plus his Destructive Blow damages the entire party at once. If you don't have the Ultimate Armor and Absolute Zero (and why don't you?), X's X Fire is a very good alternative. Be sure to have your Fire-based Weapons equipped just in case. Be sure and try to steal from him, as he holds the **Beast Lancer Weapon**, Massimo's most powerful weapon. Even with X and Zero's super Hyper Modes, this fight can prove difficult if he gets in his attacks. Once he's down, you're up a **Build LE** and the **Force Tomahawks Sub-Weapons**, as well as his DNA for Axl's DNA Change.

Once Depth Dragoon is down, backtrack all the way to the nurse Reploid and Save Point. You want a full charge of Hypers and SubTanks for the challenge ahead. While the enemies in the area can be tough, especially the Cannon Drivers, you're better off taking advantage of the free healing.

Incredible. You're still alive.

One last Save Point waits at the Final Gate, as well as quite a few goodies tucked in the alcoves. Grab **5000 FME**, **10000 Zenny**, two **Figure Tokens**, a **Cure All**, a **Backup**, a **Gain Hyper** and a **Tank Energy 100**. Behind the door is Redips' office, and he's crazy. Like, completely barking mad. "I am the ruler of all Reploids" mad.

BOSS ALERT

REDIPS

WATER	100
THUNDER	100

Redips doesn't believe in fighting alone, so he summons a pair of Red Hubcaps to help do his dirty work. These critters are incredibly annoying, using Elemental attacks and spread-shot machinegun fire on your entire party. Redips calls in a replacement as soon as one is destroyed. Fun!

Redips himself is no pushover, with a variety of multi-hit moves. He also defends quite often, reducing the strength of your attacks. Have Marino steal the **Rei Ichimonji Weapon** from him, but otherwise use her simply to weaken the Red Hubcaps and keep the others alive. X and Zero should be put into their Hyper Modes immediately to unleash them on Redips, though X's Nova Strike can also reduce the Red Hubcap threat and force Redips to waste a turn restoring them. Make sure they're both equipped with Gain WE + Force Metals to ensure an Action Trigger attack every turn. With his defeat, Redips may leave a variety of items, including **Tank Energy 10**, **Limit Buster MkII**, or a **Beam Sword**.

Redips is just *full* of surprises. He too is a shape-changer and one of his forms is very, *very* familiar. He's still not done! Once inside the Super Strato-Terminal, grab the **Figure Token** in the gem and head through the door. It's a long hallway southward, and it's infested with Red Hubcaps. Take the elevator at the end of the hallway up to the Teleport Room. The door is locked, so you'll need to use the teleporter.

Once you're in the Blue Energy Tunnel, you'll find almost the same SubTank as the one you completely destroyed your party. There's a **SubTank Energy 10** in the

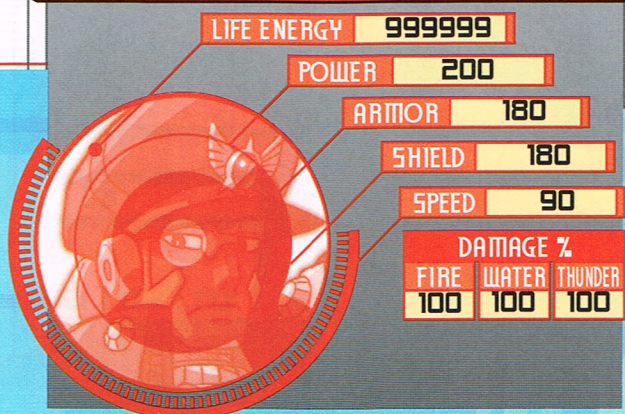

inside the yellow gem, and grab the **Gain Hyper** in the blue gem, certainly a valuable item for the fight ahead. Take the doorway and the long ramp up to where Redips waits for you.

BOSS ALERT

GREAT REDIPS

Anyone who talks about ruling the Universe is most certainly nuts. And Redips qualifies. Right now, attacking Redips himself does no good; not only does he have 999999 LE, as long as he has the two pieces of Supra-Force Metal, he regenerates every last bit of it every turn. His attacks are geared towards striking every member of the party, plus inflicting numerous status effects like Virus, Freeze and Berserk. Not only that, but the Supra-Force Metals attack as well, using powerful Elemental blasts.

So instead, target the Supra-Force Metal on each shoulder with Shot attacks, and Combat attacks will miss unless augmented with a Hawkeye Sub-Weapon. Each one has 4600 LE, relatively weak, but they regenerate after a short while. Even though the loss of each Supra-Force Metal removes part of Redips' abilities, don't bother attacking him. X and Axl should be your choice fighters here, and keep X in normal mode. While you're doing that, have Marino heal and steal. Redips holds an **SFM Fragment Alpha**, and each Supra Force Metal has a **Neutralizer -10** and **Neutralizer -20**. After destroying the Supra-Force Metals a few times, the battle pauses... and the Hunters gain some unexpected help. Round 2!

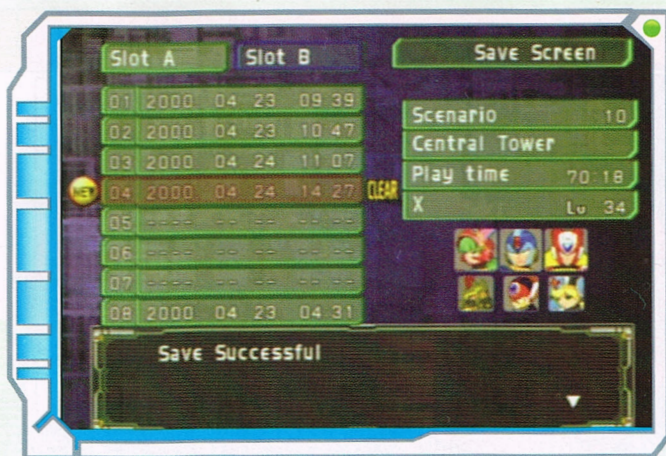

With only one Supra-Force Metal this time, Redips takes a real hit in his stats, but he's still tough. He has all the moves he did before, and his barrier is still in effect as long as he has the Supra-Force Metal installed.

Now bust out the Hyper Modes for X and Zero. Waste the Force Metal first to remove Redips' barrier, then let loose on Redips himself. Put Marino in Hyper Mode too, and have her heal and steal, steal, steal. This time around, Redips holds a **SFM Fragment Beta**, and whatever you didn't steal from the Supra-Force Metal in the first round is still available. Just keep at him, and he falls in due time.

Redips has fallen, old foes are redeemed. The world is safe once again. Time for a break...

... or not. Save your game now, and the file is marked "CLEAR". Load the file, and you're back at the beginning of Chapter 10, but you have all the items you gained through your final battles! Now is the time to claim all the items you didn't get before, plus you have one more challenge ahead. Redips' defeat earned you the **Central Key**, which unlocks the door at the bottom of central Tower. Take the Air Bus to the shopping district, and head down to Shaft 999F.

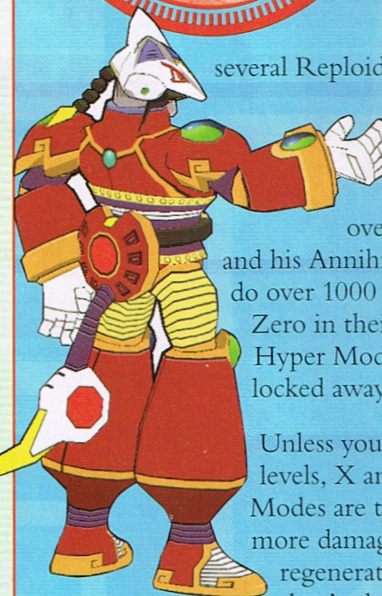

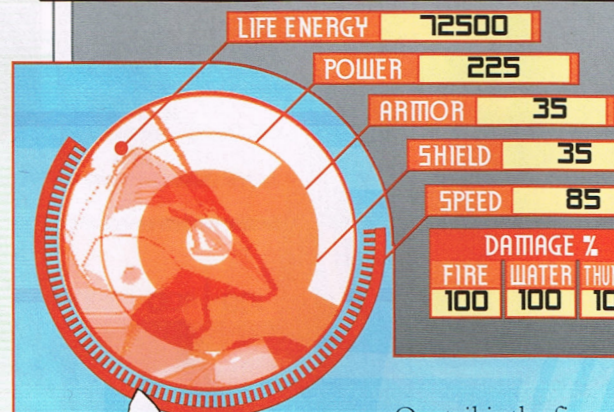

This section of the game is incredibly tough! Epsilon and Redips have nothing on the Reploids within the prison, and even the advance Hyper Modes will be taxed. Be sure to build up your levels in order to survive the challenges ahead.

Once inside the Special Sealed Area, grab the **Enter The Intruder Disc** in the green item gem, a Sky Room Prize. Get close to the Reploid standing in front of the door, and you're thrust into a fight!

Just beyond the door Onetail was guarding, grab the two **Sky Room Data Discs**, but tread carefully. Yep, there's another of the Tail clan right by the door. If you're not quite feeling up to tackling him, take the trek back the recovery room to restore all your stuff and do a little shopping for goods. Once you're ready, take him!

BOSS ALERT ONETAIL

Onetail is the first of several Reploids along this line, and every one of them is tough. How tough? Well, for starters, Onetail here regenerates over 10000 LE each turn and his Annihilator Hadoken move does over 1000 damage to even X and Zero in their Ultimate and Absorb Hyper Modes. No wonder they're locked away.

Unless you've raised some *serious* levels, X and Zero's advanced Hyper Modes are the only way you can do more damage to Onetail than he can regenerate in a round. Make sure they're both equipped with abundant Gain WE + Force Metals to give them high-WE. Action Trigger attacks every round. Even then, Onetail's recovery can really prolong the fight.

This does leave the question as to who to use as the third party member. A character without an incredibly high level, everyone else can't do enough damage to really register, so it's their support abilities that you need to look into. Marino's stealing ability is worth using while Onetail has nothing to steal. If you can't get elsewhere, they are Battle Tokens, fairly valuable items. Her speed is also an asset. In Hyper Mode she can raise the WE needed to attempt two steals easily before her Hyper Mode runs out. Cinnamon's healing ability can prove valuable as well, just be sure to equip her with heavy defensive and WE + Force Metals. Once Onetail is down, he leaves behind **Tank Part** and a **Figure Token**.

There's only one Fourtails, but he packs in a ton of power. The hated Hadouken does massive damage to the entire party. To make matters worse, he adopts the same manner of defense as Scarface, forcing you to alternate between Shot and Combat attacks to prevent him from having an effective shield against your moves. His only Elemental attack is Thunder-based, but that's really only a threat to whoever's backing up X and Zero; the two main Hunters' Force Metal slots are best left to enhancing their Hyper Modes, preferably WE Gain. Once he's down, he leaves behind a **Figure Token** and the **Red Lotus Saber**, a powerful—if somewhat costly—Weapon for Zero.

With Fourtails down, the area is clear. Restore your powers if needed, and venture to the second level of the sealed area. The green gem has another **Sky Room Sketch** within it, and, there's the next Tails clan member waiting by the door. At least there are no random encounters here, count your blessings while you can.

With Fourtails down, the area is clear. Restore your powers if needed, and venture to the second level of the sealed area. SHIELD 85

SPEED 90

DAMAGE %

FIRE	WATER	THUNDER
100	100	100

Seven is *not* your lucky number. And certainly not when there's two of them. Nor when they heal LE every turn. And like the Belladonnas, they get a little stronger every time they're attacked, so when their turn

comes up even their normal strikes can do massive damage. Go to Hyper Mode as soon as possible, but do not attack right away. Go defensive and let your

WE build. As soon as you get above 90 WE, let loose with the Action Trigger on a single Seventails, making sure that the *immediate* next turn taken is another Hyper Action Trigger against the same one. You want to destroy the Seventails before it gets in its turn and lets loose all the energy you pumped into it back at you. Thunder is their Element of choice, but you probably won't get hit by it too much, since they favor physical blows. Their comparatively low defensive abilities are a small blessing, at least. Once they're down, they each leave behind a **Figure Token** and **Vitality Missile**.

As always, make sure you're back to full before tackling the next challenge. Grab the four **Sky Room prizes**, then retreat and restock if needed. You're inching closer to the end of the Secret Area, so of course it's only going to get rougher. Which does beg the question as to how they were subdued and locked down here in the first place... or maybe they don't *want* to leave?

BOSS ALERT

THUNDER	100

Two Eighttails, and their stats aren't too impressive for being this deep into the prison. But don't get cocky. They have the full complement of Element attacks at their disposal, but that's not the real threat. No no. The bad part about this fight (okay, the *really* bad part, as this isn't exactly a

pleasure cruise in the first place) is that if one Eighttails is destroyed, the other can use SOS to call in another Eighttails to replace it! While this can certainly be a good EXP-gaining opportunity, it's also a prime chance to get your head handed to you. If you're lucky, the remaining Eighttails will instead try to attack; with X and Zero's Hyper Modes both being airborne, they have a much better chance at dodging his Combat attacks, and leaving him open for hurt. Like the Fivetails, Eighttails do not have a guaranteed item-drop on defeat, and the chances of them dropping an item are pretty slim, but very nice if they do: the **LE +1000** and **Full Specs +10 Force Metals**.

Eighttails called for backup

Backtrack to heal and save if you think you need to... well, saving is always good. The final section of the Sealed Area is dark indeed, visibility is low. Grab the nine **Sky Room prizes** along the way, and ignore the split off from the circle for now. Head all the way to the end of the circle to discover a wonderful prize...

A premium figure vending machine! No wonder they were isolated in a basement; they wanted those high-value and ultra-rare action figures to themselves! It all makes perfect sense now! Once you've spent your Figure Tokens, return to the split-off and take it to the small room inside the circle. Within is the final and most powerful member of the Tail clan, and he's more than ready to fight!

BOSS ALERT

LIFE ENERGY 92500

POWER 400

ARMOR 90

SHIELD 95

SPEED 140

DAMAGE %

FIRE	WATER	THUNDER
100	100	100

Ninetails is an odd one. His sheer power gives him the strength to decimate your party... yet he also has Regeneration, which he occasionally uses to revive any of your fallen members and restore 25% of their LE. Maybe he just likes beating up you so much that he doesn't want it to end so soon. His Nine Fragments move hits up to nine times, each hit ranging from 699~999 damage, which can really pile up. He also regenerates over 10000 LE each turn, adding to the fun. He has the full range of Elements, but considering his massive power, that's the least of your concerns. Consider yourself *lucky* if he uses a Fire attack rather than an Annihilator Hadouken or Nine Fragments.

What strategy? All you can do is overpower him. Build up your levels before taking Ninetails on, and max out X and Zero's WE regeneration to make sure they get a near-100 WE Action Trigger every turn. Your backup member exists solely to heal here. Once Ninetails is down, he leaves behind a **Figure Token**, the **Ancient Gun** weapon for Axl, plus a DNA sample to finish up Axl's DNA Change chart!

With that, grab the six gems Ninetails was guarding; each one contains a **Sky Room prize**. You have bested the toughest of the tough... but can you make yourself even better? Keep building levels, exploring, stealing... you want everything, right?

THE RESISTANCE

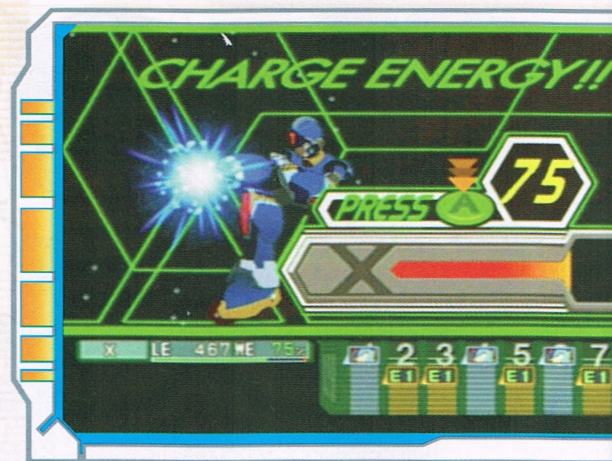

X

The final creation of the brilliant and kind-hearted Dr. Light, and the machine on which the Reploid race was built on, X wants nothing more than to live in peace. But he knows that as long as evil threatens the world, he must use his incredible and ever-expanding powers to defend the innocent. His potential power limit has yet to be achieved, or even calculated. He is often tormented by having to destroy other Reploids in order to achieve what seems to be only brief moments of peace, and his desire for nonviolent resolutions and his deep sense of trust can sometimes be exploited. But through it all, X will never, ever give up.

Versatility has always been X's strength. Though he favors Shot attacks normally, his Hyper Mode lets him switch to up-close Combat attacks if needed. He has Buster weapons for all three Elements and a high capacity for Force Metal use, making him a mainstay in your party.

Final Strike Attack Style: Shot

ACTION TRIGGER: CHARGE SHOT

One of X's signature moves, and a very easy Action Trigger to pull off. Press and hold the attack button to charge Weapon Energy, and release it to fire a spread-shot that strikes all enemies. The more WE charged, the stronger the shot. A 100% charge guarantees a critical strike.

HYPER MODE: X FIRE

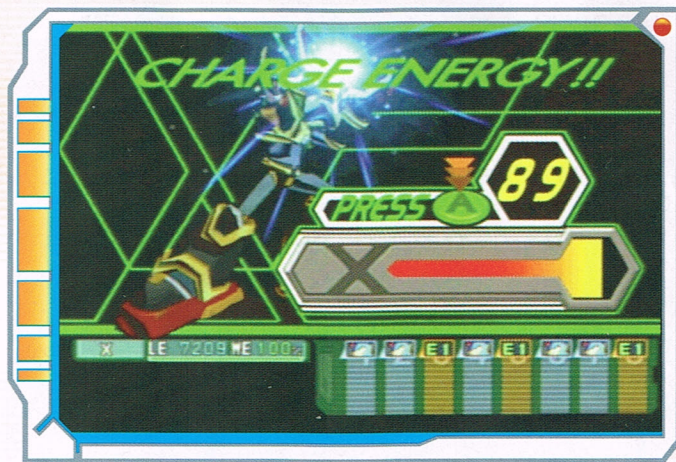

Also known as the Cross Fire, X gains significant power, but loses his ability to strike multiple targets at once, switching to a primarily Combat-attack pattern. Both his unchangeable Shell Buster Sub-Weapon and the X Collider standard attack are Fire-Element moves, but X himself remains a neutral Element, his resistance to Fire and Water attacks not changing for better or worse.

Final Strike Attack Style: Combat

Stat Changes: LE +50%, Power +50%, Speed +25%, WE Gain +25%, 50% damage from Combat/Shot attacks

Sub-Weapon 1: Power Charge

Sub-Weapon 2: Shell Buster

X FIRE ACTION TRIGGER: CHARGE COLLIDER

Press and hold the attack button to charge up Weapon Energy, and release it to activate a multi-hit Fire burst to a single target. The more WE charged, the stronger the attack.

HYPER MODE: ULTIMATE ARMOR

Hunting from the air with automatic weapons... now *that's* a sport! Getting this powerful flying form is a challenge, but well worth the effort. X gains incredible offensive power with the Giga Crush main weapon and a pair of powerful Sub-Weapons, plus being a flier gives him higher chance of dodging Combat attacks.

Final Strike Attack Style: Shot

Stat Changes: Power +100%, Speed +50%, WE Gain +40%

Sub-Weapon 1: Impact Cannon

Sub-Weapon 2: Strike Bullet

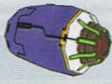

ULTIMATE ARMOR ACTION TRIGGER: NOVA STRIKE

A Final Strike all by itself, X unloads both Sub-Weapons and a missile rack into the enemy party. Change the target with the joystick and rapidly press the attack buttons within the time provided. The more WE when activated, the more firing time, leading to increased damage.

ZERO

Like X, Zero is actually a relic of a bygone century. He was originally built by the villainous Dr. Wily to be the ultimate weapon, locked in a time capsule just as X was and set to awaken at the same time... then seek out and destroy him, as well as spread a malignant computer virus across all robot-kind. But the virus was passed to the Hunter Sigma, and Zero soon became one of the most powerful Maverick Hunters himself. But he cannot fully escape his dark origin; he is often aloof and chilly, does not trust strangers, and in battle can be absolutely ruthless.

Close-range power is Zero's game. Like X, he has Weapons for each Element, giving him a greater range against bosses. But Zero's ability to use Force Metals is very diminished, with only three slots and a much lower immunity to Force Metal overload. He's also a little slower, but when he hits, he hits hard.

Final Strike Attack Style: Combat

ACTION TRIGGER: COMMAND ARTS

Zero trades in his WE for the ability to chain together a string of attacks against a single foe. Enter repeated joystick/button commands within the time limit given. The higher Zero's WE when activated, the more time you have to input commands. Though he starts with only three available moves, he can bring this up to five moves with 300 then 999 successful command inputs total.

COMMAND ARTS

COMMAND	ATTACK	EFFECT
↓↘→ A/●	Zero Slash	Standard attack at -20% power
↓↘↙ A/●	Zero Breakthrough	Attack at -70% power, ignores enemy armor
→↓↘ A/●	Zero Dragon Slash	Attack with 65% accuracy against airborne enemies
↔↘↓↙→+ A/●	Zero Wave Slash	Attack randomly between -50% and +100% power
→↘↓↙↘↙→+ A/●	Zero Skull Crush	Guaranteed critical attack

HYPER MODE: BLACK ZERO

Zero's shadowy color scheme does more than go with any outfit. His abilities are enhanced considerably, giving him more power and a much quicker turnaround time. Compared to X though, his Hyper Mode does not last too long, so spend a few Gain Hypers on him.

Final Strike Attack Style: Combat

Stat Changes: Power +100%, Speed +50%, WE Gain +25%, 75% damage from Fire attacks

HYPER MODE: ABSOLUTE ZERO

Looking for all the world like the powered-up form of Dr. Wily's other "ultimate" killer robot, Absolute Zero is a devastating form geared toward combat attacks with an Ice Element effect. As a flier, his evasion to Combat attacks is naturally increased. There is another risk with this form though; if Zero's LE is at 25% or less when his turn comes up he goes Berserk, and not even a Cooler Item can calm him down. The only way for him to return to normal is if he hits himself, or if his LE rises to 26% or more before his next turn.

Final Strike Attack Style: Combat

Stat Changes: LE +50%, Power +100%, Speed +50%, WE Gain +50%, 50% damage from Water attacks

Sub-Weapon 1: Brutal Right

Sub-Weapon 2: Killer Left

ABSOLUTE ZERO ACTION TRIGGER: CALAMITOUS ARTS

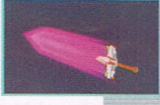

An incredibly well-named move, Zero gets right in his target's face and begins a savage pummeling. Watch the display at the bottom of the screen and press the randomly-selected joystick/button combination given to attack. The higher Zero's WE when activated, the more time he has to attack, plus more powerful moves are put into the move pool.

CALAMITOUS ARTS

COMMAND	ATTACK	EFFECT
← + Y/■	Left Kick	Guaranteed critical Ice attack at +25% power
→ + X/▲	Right Kick	Ice attack at +50% power
↓ + Y/■	Surge Strike	Combat attack randomly between -50% and +100% power
↑ + X/▲	Rising Dragon Punch	Ignores target armor
Y/■, X/▲	Skull Crush	Guaranteed critical strike at +25% Power
A/●	Whirlwind Leg	Ice attack at -25% power, ignores target armor

SPIDER

A mysterious bounty hunter, Spider's true motives are unclear at best. An amoral loner willing to do any job for the highest bidder, Spider changed his tune upon discovering the death of his old partner, Aile, and joined X and the Resistance against the Rebellion. Or so he claims. But there is far more to Spider than meets the eye, and the secrets he holds could be catastrophic for all Reploid-kind.

Spider may not be much for variety of attack, but he's pretty solid with his Card Launcher. All of his weapons are fairly ordinary shot attacks, but each of the four weapon-card suits available to him has a different bonus effect when his LE is at 75% or more, two of which directly add to his offensive potential. He's pretty quick and a good dodger, a solid character for the early levels.

Final Strike Attack Style: Shot

ACTION TRIGGER: FORTUNE CARD

When Spider deals a hand of poker, his opponents can lot more than their shirts. He draws five cards with val from 8 up to Ace, and can switch out any or all of them he wishes once. The results of his hand determine wha attack will be. The higher his WE is when activated, th luckier he is, meaning a higher chance of more powerfu hands.

FORTUNE CARD CHART

HAND	EFFECT
Pair	2-shot attack
Two Pair	2-shot attack, 2nd shot +50% critical chance
Tri Card	3-shot Fire, Water & Thunder attack
Straight	5-shot attack, final shot guaranteed critical
Flush	1-shot Blinding attack
Death House	1-shot attack with chance of instant kill
Four Penalty	All enemies -25% Power, Armor, Shield and Speed
Straight Flush	3-shot attack against all enemies, final hit guaranteed critical
R5F	+200% shot attack against all enemies, high instant-kill rate

HYPER MODE: TRICKSTAR

Spider is indeed a tricky one; when he slips into Trickstar mode, he can't be touched. Enemy attacks of all varieties slide right through him, he's not affected by status changes; he is completely invulnerable, plus he gets a nice power-boost. However, this comes with two downsides; first, the move has a very low number of active turns, and second, Spider's not even affected by *allies'* moves, so aiding items are wasted on him while he's cloaked.

Final Strike Attack Style: Shot

Stat Changes: Power +100%, Speed -25%

SPIDER'S WEAPONS

WEAPON	POWER	ARMOR	SHIELD	SPEED	OBTAIN	DETAILS
Jack of Spades	15	5	6	0	Ch.3 Shop	Attacks all at WE 75%+

MASSIMO

Steel Massimo is a legend among the Resistance; a warrior of colossal strength and endurance who has faced legions of Rebellion forces and won. But precious few know the truth; the “true” Massimo was in fact captured and executed by the Rebellion. But his armor was entrusted to another Resistance fighter, who reluctantly took the mantle of and name of Massimo. Though scared out of his mind at first, working with X has shown him how to be strong mentally as well as physically, and given him the confidence in himself he needs to continue the legacy of Steel Massimo.

Massimo is at a big disadvantage when fighting enemies that use Elements, as he takes 150% damage from all Element attacks without Force Metal augmentation. This too is tricky, as Massimo only has two slots for Force Metals. But when it comes to raw physical combat, Massimo's hard to top. If you need muscle, he's your Reploid.

Final Strike Attack Style: Combat

ACTION TRIGGER: BERSERK CHARGE

Drawing up his WE reserves, Massimo converts it all into a powerful beam of energy against a single target. Mash the buttons under each bar within the time limit provided to juice up the beam. The higher Massimo's WE when activated, the more time he has. He starts with only the ability to increase his attack power and add status effects, but can add two more effects by inflicting over 3000 damage, or over 10000 damage within a single turn.

Attack: Up to +100% power

Code Red: Add Blind, Virus, Bind and Berserk effects

Criticals: Up to 80% chance of Critical Strike

Multistage: Up to 12 successive hits

HYPER MODE: GLINT ARMOR

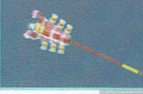

Massimo was by no means a lightweight before, but the Glint Armor makes him positively heavy-duty hardware. Though his moves are all the same as before, his offensive and defensive ratings are boosted considerably. Plus he's nice and shiny!

Final Strike Attack Style: Combat

Stat Changes: LE +50%, Power +50%, Armor +25%, Shield +25%, WE Gain +50%, -50% damage from all Element attacks

MASSIMO'S WEAPONS

WEAPON	POWER	ARMOR	SHIELD	SPEED	OBTAIN	DETAILS	
	Massive Lance	18	7	6	-8	Starting weapon	
	Massive Lance Beta	34	15	14	-12	Ch.6 Shop

	Beast Lance	120	30	30	-20	Depth Dragoon (steal)	Fire attack, recoil damage

MARINO

Lightning-fast with weapons as well as wit, Marino describes herself as a “petty thief”, but her ambitions are anything but petty. Seeing the conflict between the Rebellion and Resistance the perfect smokescreen for her activities, she snuck into Giga City in order to steal the rumored Force Metal Generator for herself. But when she was nearly killed by Dr. Psyche’s goons, Cinnamon saved her life, and she threw her lot in with the Rebellion. Though she still acts like a cynical loner at times, Cinnamon and X’s selfless behavior has brought out a more generous side to her.

Marino makes up for her relatively low strength with incredible speed and versatility. She can equip both Combat and Shot Weapons, the latter also being available in all three Elements, further increasing her flexibility. Her various Action Trigger results up her offensive skills, plus allow her to liberate enemies of valuable items that would otherwise be quite difficult to take.

ACTION TRIGGER: EMOTIONAL REEL

It takes a sharp eye and good reflexes to use, but the Emotional Reel’s variety of attacks can really help. As the reels spin; hit the attack button to stop them so they line three of the same symbol in a row. Mismatched symbols (three “minus” symbols) results in the Marino Stamp, a Combat attack that’s only 30% stronger than her normal move. Though she starts with only three winning combinations, she can raise it to five as time goes on.

Final Strike Attack Style: Combat

EMOTIONAL REEL CHART

MOVE	EFFECT
	Hyper Dive Combat attack at +100% power
	I'll Take That! 1-hit attack, guaranteed item steal
	Your Life, Please! 3-hit attack at +50% power, LE gain equal to damage given
	Scattered Flower 3-hit Shot attack with high chance of instant-kill
	Mirage Dive 1-hit Combat attack at +150% power
	Marino Stamp Combat attack at +30% power

HYPER MODE: QUICKSILVER

Marino's Hyper Mode has several enhancements, but they all pale before her phenomenal speed. At higher levels, Quicksilver can give her a string of a half-dozen or more uninterrupted turns! While this can be used to lay on a steady stream of attacks, it's also useful for using multiple party-assisting items or sub-weapons, prepping them for combat.

Final Strike Attack Style: Combat

Stat Changes: LE +50%, Power +20%, Speed +200%, 75% damage from Water attacks

MARINO'S WEAPONS

CINNAMON

Created by Prof. Gaudile, Cinnamon is young, timid and innocent... which Gaudile hoped would prove the perfect disguise for the powerful Force Metal Generator contained within her body. His precautions failed, however, as both the thief Marino and the Rebellion's Dr. Psyche came looking for her. But Cinnamon quickly befriended the thief, and witnessing X and Marino's fight against Psyche encouraged her to join the Resistance, and her conviction won over the reluctant Gaudile as well.

Cinnamon's strengths lie more in her healing skill and support effects. Most of her Weapons are designed to inflict added effects like Virus and Berserk, or lower the target's attributes. Her default Energy Field briefly supplies the party with extra WE, a valuable ability in a pinch. Her low strength is also counterbalanced by her high defense against Elements; she only takes 50% damage from any Elemental attack.

Final Strike Attack Style: Shot

ACTION TRIGGER: ANGELIC AIDE

Round and round the secondary joystick goes, and when it stops, the LE grows. (Sorry.) As you rotate the secondary joystick, hearts grow on the screen, and each complete rotation restores 10% of the party's maximum LE. She starts with only the ability to restore 20%, but as time progresses, more hearts become available, increasing her healing ability.

HYPER MODE: IRON MAIDEN

Cinnamon doesn't look quite so innocent in this getup. Which is somewhat befitting, as it boosts her offensive skills. Iron Maiden is also unique in that it actually effects her active teammates as well, giving them an added 25% to their WE gain rate!

Final Strike Attack Style: Shot

Stat Changes: LE +50%, Power +50%

CINNAMON'S WEAPONS

	WEAPON	POWER	ARMOR	SHIELD	SPEED	OBTAIN	DETAILS
	Angels Hand	14	14	18	-16	Starting Weapon	2-hit attack
	Archangel	34	24	24	-20	Ch.8 Shop	2-hit attack

	Melting Arm	33	16	16	-2	Ch.7 Shop	Reduce Enemy shield 50%
	Head Hammer	59	18	18	-4	Ch.9 Shop	Berserk enemy
	Metal Boxer	20	3	3	-16	Ch.5 Shop	2-hit attack, high critical %, evasion +15%
	Full Metal Boxer	56	5	5	-24	Zwei Hammer (drop)	2-hit attack, high critical %, evasion +15%
	O Effector	52	20	20	-4	Preon Doc (drop)	Nullifies enemy assist effects
	Kittu Gloves	16	8	8	0	Cumin's Secret Shop, Gift Box (drop)	5-hit attack, reduce enemy stats

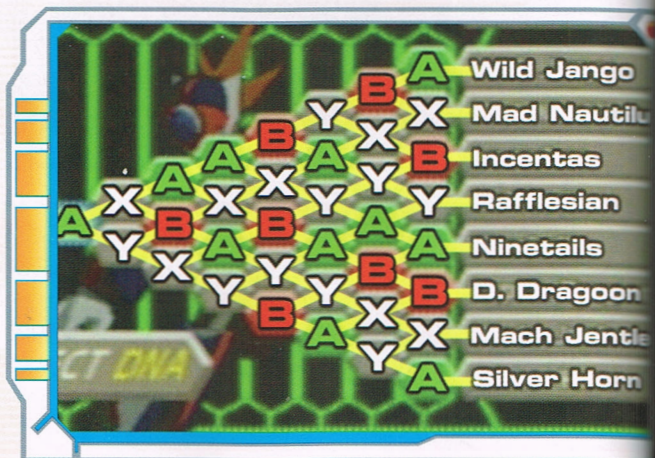

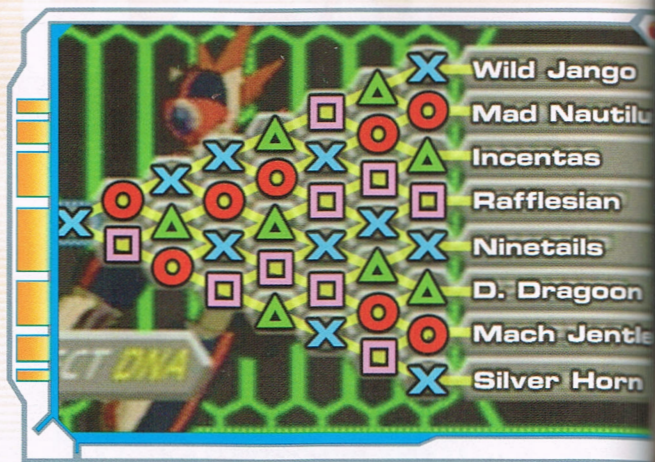

AXL

A young Reploid of unknown origin, Axl was originally a member of the Red Alert bounty hunter organization. But when Red Alert was infiltrated by the evil Sigma and its agents turned Maverick, Axl fled and soon found himself in the company of the Maverick Hunters Zero and X. Axl idolizes the two Hunters, and yearns to be a Hunter himself, but has set out to prove his worth as a rogue agent, much to X's chagrin. The search for clues to his own origin and his shape-changing ability has led Axl to Giga City, where rumor has it similar technology has been developed...

Axl quite effectively replaces Spider in the projectile-thrower department, with a much wider variety of attack styles. Most of his weapons can be bought rather than needing to be won or found, making equipping him to your satisfaction easier. On top of all that, his DNA Change gives him some incredibly powerful attacks, some with Element properties!

Final Strike Attack Style: Shot

ACTION TRIGGER: DNA CHANGE

A keen eye or good memory is needed to activate the DNA Change. As certain bosses fall, Axl takes a DNA sample from them, which allows him to assume their form for a brief time and utilize their powerful attacks. Activating each form requires pressing buttons along a branching chain to reach the intended form. The higher Axl's WE when the move is activated, the more time he has to complete the DNA sequence. If you end up hitting a blank space or not finishing the chain in time, Axl performs the Rolling Axl, a shot attack at only +30% power.

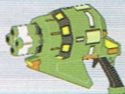

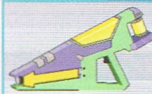

DNA CHART

BOSS DNA	EFFECT
Wild Jango	Thunder attack at up to +100% power
Silver Horn	500-damage Water attack to all enemies
Mad Nautilus	Attack all enemies, random Blind, Virus, Berserk & Bind effects
Mach Jentler	500-damage Fire attack to all enemies
Incentas	2-hit combat attack
Depth Dragoon	3-hit 250-damage Thunder attack to all enemies
Rafflesian	Fires 10 200-damage missiles at every enemy
Ninetails	9-hit 999-damage combat attack

HYPER MODE: STEALTH MODE

Axl's Hyper Mode bears a striking resemblance to Spider's. He gets the same Power boost, as well as complete immunity to anything anyone throws at him, be it enemy or ally. And like Spider's Trickstar, Stealth Mode does not last long at all. Consider spending a couple of Build Hypers on him; as Stealth Mode can really save your party against bosses.

AXL'S WEAPONS

	WEAPON	POWER	ARMOR	SHIELD	SPEED	OBTAIN	DETAILS
	Axl Bullets	20	10	10	-18	Starting weapon	2-hit shot

Shot Absorber	15	-	Silver Horn, Preon 5 Botos	Reduce Shot damage 25%
Super Absorber	25	-	Secret Shop, Grave Item Gem	Reduce Combat & Shot damage 25%
Vengeful Counter	25	-	Degraver	One chance for counterattack

FORCE METAL DATA

This list only mentions the FM Generator under "Obtain" if the Force Metal cannot be obtained by other means.

Force Metals alter your Reploids' abilities, resistance, and give other effects. Be careful as you install them into your party members, making sure that the installed Metals' combined Erosion rating is equal to or lesser than your characters' Immunity level, or they will suffer negative effects in battle.

While most Force Metals can be purchased in shops, some must be taken from enemies, and a few are only available via the Force Metal Generator.

Lucky Girl	Increases Zenny gained in battle by 10%	5	FM Generator
Good Luck	+3% chance of winning item in combat	7	FM Generator
Monopoly	All battle EXP goes to single character	7	FM Generator

FORCE METAL GENERATOR

Once Cinnamon joins the party, you have access to her internal Force Metal Generator. This enables you to create Force Metals as you need them, provided Cinnamon is at a high enough level, you have the recipe, the proper ingredients, and enough Force Metal Energy. Some recipes require you to perform certain feats to discover them, though!

FORCE METAL GENERATOR

MAVERICK FILES

Some enemies have a certain amount of "stamina"; an amount of damage they can take before a negative effect occurs like cracked armor, interrupted charge moves, or being knocked out of the sky. This amount appears in parenthesis beside their Life Energy.

ATTACKS

DEPLOYMENT CENTER & THE SKY ROOM

Once Nana is in the operator's seat at Central Tower, she is able to restore a few functions of the base, including the Mechaniloid Deployment Center and the Sky Room. While these features are completely optional, not affecting the storyline, the prizes to be won from them can be of great assistance.

THE DEPLOYMENT CENTER

The Deployment Center is amazingly easy to use. In a nutshell, all you do is select up to three of your available Mechaniloids to send into areas you've already cleared to collect items and Zenny. Check back into the Deployment Center after a little while to see who's come back and what they've brought you. Most of the prizes they bring back are design sketches, music files and video clips, but there are also valuable items to be found too!

Each Mechaniloid is programmed to seek out a certain variety of prize. Combat units (red) are focused on destroying enemies and collecting Zenny. Search units (yellow) are primarily focused on seeking out items. And Intelligence units (green) are after data discs full of supplemental information. Nana offers her opinion of your unit choices before you send them off, pay heed to her words.

Your units might not make it back intact, though, if they aren't strong enough to handle the area. Thankfully, you do not lose deactivated units; they're automatically repaired and ready to be deployed right away. All you've done is lost a little time, no sweat. Mechaniloids advance with successful missions, improving their skills and chances of success for more difficult areas.

Mechaniloids for the Deployment Center are scattered across the eight areas. Most of them only need to be examined to be warped back to base, but some require a special item in order to be started up before you can use them.

MECHALOID CHART

	MECHANOLOID	TYPE	VIT	ATTACK	SEARCH	INT	MOVE	FOUND
	D-Shark	Combat	32	3	1	1	2	Deployment Center start
	Big Monkey	Combat	36	4	2	1	2	Gaudile East Deck Residential Division 102
	Einhammer	Combat	46	4	2	2	1	Ulfat Smelting Furnace 2 (needs Ball & Chain Hammer)
	Killer Mantis	Combat	50	5	2	1	3	Ulfat Freight Lift 1
	Radar Killer	Combat	40	5	2	2	4	Tianna Maze Area 1 (locked area)
	Mega Mantor	Combat	52	6	2	3	1	Gimialla L2 Northeast Division (needs Mini Battery)
	Liquid Glob	Combat	56	6	3	3	2	Vanallia Quicksand South Side (needs Cyber Liquid)
	Meltdown	Combat	60	7	3	2	1	Melda Missile Maintenance Room
	Patrol Dog	Search	28	1	3	2	3	Deployment Center start
	Preon	Search	32	1	3	1	2	Gaudile East Deck High Speed Lift Area
	Dober Man	Search	34	2	4	2	3	Gaudile Great Stump Hall (needs Bone Key)
	Rush Loader	Search	40	3	4	1	5	Ulfat Smelting Furnace 1
	Degraver	Search	44	1	5	1	2	Gimialla L3 Northwest Division
	Mega Tortoise	Search	48	2	4	1	1	Vanallia Desert Quicksand (needs Mini Battery)
	Deerball	Search	40	2	8	5	2	Lagrano East Block Stairs 4F ~ 5F (locked area)
	Wolfloid	Search	44	3	6	1	6	Melda Area B-304
	Sinedropper	Intell	20	1	2	3	5	Deployment Center start
	Bat Bone	Intell	22	1	2	3	5	Gimialla L2 Northwest Division
	Blowfish	Intell	24	2	2	4	6	Tianna Aqua Colliseum (needs Mini Battery)
	Mettaur	Intell	26	1	3	4	3	Gaudile West Deck Main Route
	Pararoid	Intell	20	1	2	4	4	Vanallia Jammer Energy Control Room (needs Mini Motor)
	Rabbid	Intell	26	1	3	4	3	Melda Ore Plant External Tank
	Gold Blader	Intell	48	2	5	6	5	Gimialla L3 Southwest Division (needs Heavy Motor)
	Bladey	Intell	44	5	4	7	7	Grave Level D Security Zone

How you assemble your search party has an effect on their success chances as well as the individual Mechaniloids' stats. The right combo of search types can really boost their luck, leading to more items found and higher probability of survival! Bear in mind that even a lucky unit can come back beaten and empty-handed if they're simply not strong enough.

DEPLOYMENT AREAS

LAGRANO RUINS

Zenny: 3000

Items: Tank Parts, Lagrano Key, Good Luck Force Metal, Figure Token x2, Lagrano Ruins Figure

Design Art: #2 X's Scarf, #34 Hippopressor, #36 Patrol Dog, #88 Ruins

Data Files: #8 About Giga City, #9 Lagrano Ruins

Background Music: #13 Maverick Hunter 2, #24 Fight, XI, #31 Darkness and Despair, #48 Giga City Memories, #49 Trajectory of Battle I

Videos: #2 Analysis, #3 Hippopressor, #4 Epsilon, #5 The Cadre

CENTRAL TOWER

Zenny: 3000

Design Art: #14 Residents, #20 Chief Rough, #27 Aile, #38 Einhammer, #60 Headquarters, #90 Container Ship, #97 Headquarters Plan, #98 Base plan, #100 Market

Data Files: #2 Building Giga City, #10 Central Tower

Background Music: #2 Steal Hope Back, #12 Central Tower, #17 Event Battle, #30 Spider Magic, #32 Brush With Danger, #34 Sympathy and Sorrow 2

Movie Files: #6 Secret Resistance Base, #7 Wanted Dead or Alive, #8 The Bounty Hunter, #9 Enter Aile, #10 Vow to Aile, #11 The Bargain With Jango, #12 Spider Returns, #13 Wrath Of Jango, #14 Spider Reformed, #15 Spider Joins The Fight

TIANNA CAMP

Zenny: 4000

Items: Block All Force Metal, Tianna Key, Tianna Camp Figure

Design Art: #12 Silver Horn, #17 Nana, #19 Prisoner Nana, #29 D-Rex, #30 Gulpfast, #31 Dober Man, #50 True Massimo, #61 Seabed Tunnel, #62 Submarine Paths, #64 POW Camp Corridors, #65 Prison Guards' Office, #66 Prison Guards' Room, #67 Undersea Cell

Data Files: #3 Turning Maverick, #11 Tianna Camp

Background Music: #3 Subterranea, #11 Hunter Base, #15 Final Battle, #27 Steel Massimo, #36 Resolution

Movie Files: #16 Enter Massimo, #17 Nana and Silver Horn, #18 Entrusted With a Legacy, #19 Battle with Silver Horn

GAUDILE LABORATORY

Zenny: 3000

Items: Generator Sub-Weapon, Meet Marino! Poster

Design Art: #13 Psyche Mecha, #25 Gaudile, #26 Cinnamon, #28 Marino, #32 Rabbid, #33 Killer Mantis, #35 Pararoid, #40 Mad Nautilus, #41 Dr. Psyche, #70 Lab Elevator, #71 Lab Exterior, #72 Lab Corridors, #73 Tunnel, #74 Laboratory, #75 Lab Rough

Data Files: #4 Birth of Epsilon, #11 Gaudile Laboratory

Background Music: #4 Forest Treasure, #28 Marino The Thief, #29 Help Me! Cinnamon, #33 Peace and Tranquility, #42 Talking

Movie Files: #20 Enter Marino, #21 Dr. Psyche, #22 Cinnamon and Marino, #23 Enter Gaudile, #24 Cinnamon's Secret, #25 Marino in a Tight Spot, #26 Battle With Psyche

Each area has a set list of available treasure. Keep sending in Mechaniloids until you've claimed every single piece of booty!

ULFAT FACTORY

Zenny: 5000

Items: Stamina Missile Sub-Weapon, Reverse Fire Force Metal, Figure Token x2, Ulfat Factory Figure

Design Art: #16 Crow Boss, #42 Axl Expressions, #76 Controlling Device, #77 Factory Control Room, #78 Smelting Furnace, #93 Monitor Room

Data Files: #5 Epsilon's Uprising, #13 Ulfat Factory

Background Music: #5 Unknown Energy, #26 Enter Axl, #37 Beaming With Joy, #43 Resistance Lines

Movie Files: #27 Enter Axl, #28 Jentra, #29 X and Zero Meet Again, #30 Battle With Jentra, #31 Duboar Berserk, #32 Axl Transforms

GIMIALLA MINE

Zenny: 4000

Items: Reverse Thunder Force Metal, Gimialla Key, Figure Token, Preon Invasion Poster

Design Art: #11 Shadow, #48 Evil Shadow, #51 Marino Sketch 1, #52 Marino Sketch 2, #79 Mine Corridor

Data Files: #6 The Task Force, #12 Gimialla Mine

Background Music: #6 A Friend in Danger, #25 Standby Zero, #35 Sympathy and Sorrow 2

Movie Files: #33 Zero Goes It Alone, #34 A Strange Light, #35 Shadow Arrives, #36 Zero and Shadow, #37 Sneak Attack, #38 Battle With Incentas, #39 The End of Spider

VANALLIA DESERT

Zenny: 6000

Items: Block All Force Metal, Super Absorber Sub-Weapon, Bait Sub-Weapon, Tank Parts, Fearsome Foe Poster, Vanallia Desert Figure, Figure Token x3

Design Art: #44 Botos, #80 Desert Entrance

Data Files: #6 The Task Force, #13 Vanallia Desert

Background Music: #7 Desert Maze, #14 Maverick Hunter 2, #16 Boss Battle, #40 Mysterious Ways, #41 They Call Me Botos!, #44 Mission To Rebel, #47 Do You Copy?

Movie Files: #40 Ferham, #41 Enter Botos, #42 Botos Escapes

MELDA ORE PLANT

Zenny: 8000

Items: Reverse Water Force Metal, Melda Key, Secret Assembly Poster, Melda Ore Plant Figure, Figure Token

Design Art: #37 Degraver, #45 Ferham Expressions, #46 Scarface, #47 Redips, #81 Plant Corridors, #82 Plant Room, #83 Missile, #84 Missile Silo

Data Files: Melda Ore Plant

Background Music: #8 Glacial Activity, #38 Strength and Valor, #39 Rebellious Ambitions, #45 A Rebel's Fate, #46 Mystery Metal

Movie Files: #43 Battle With Botos, #44 Battle with Ferham, #45 Ferham Falls, #46 Fated for Betrayal, #47 Stolen Supra-Force Metal

THE SKY ROOM

All of the goodies you've acquired are on display in the Sky Room. Inside the display cabinet you can view all your Action Figures, the game development sketches, and the supplemental data files. The Sky Room can be decorated with one of ten

different posters, hung next to the jukebox containing background music and the movie files. Finally, the computer on the right holds onto your personal data; targets met, battle data, your spending habits and how many items you have left in each level! You can also change the color of X's energy-scarf, if you've acquired new colors.

There are 36 Targets to achieve in the game, each one earning you a new prize for the Sky Room. However, the computer does not give you the Target requirements until you actually reach them!

CHALLENGE CHART

TARGET	PRIZE
Fought over 500 battles	Yellow Scarf
Collected all sketches	Purple Scarf
Complete Figure Sets Part 1 ~ Part 10	Poster #4 The Deadly Trio!
Talked to citizens over 100 times	Poster #5 Swarming Armada
Completed over 10 play hours	Poster #6 Viva la Resistance!
Used over 100000 FME in the Generator	Poster #9 Cinnamon's Secret
Completed Deployment recovery	Poster #10 Hunter Base
Defeated over 100 Mettaur-type enemies	Figure Set Mettaur Special
Defeated over 100 enemies	Figure Set Preon Special
Defeated over 500 enemies	Figure Set Preon Special II
Defeated over 1000 enemies	Figure Set Preon Special III
Obtained over 100000 EXP	Figure Set Mini Mechs
Activated over 100 Final Strikes	Figure Set Retro Mechs
Achieved over 100 Critical Strikes	Design Art #3 X Ninja Version
Used over 100 Action Triggers	Design Art #4 X Flying Version
Achieved over 150 consecutive hits	Design Art #5 X's Armor
Performed attack over 9999 damage	Design Art #7 X's Guns
Collected all Video Files	Design Art #15 Rafflesian
Purchased over 40 Main Weapons	Design Art #18 Nana Sketch
Collected all Disc Files	Design Art #21 Dr. Psyche Sketch
Fought over 100 battles	Design Art #22 Mouse Mecha
X's Level over 30	Design Art #23 Support Mecha
Defeated over 100 Preon-type enemies	Design Art #39 Preon Army
Collected all field items	Design Art #55 Mega Man?
Collected all Music Files	Design Art #56 Duckbill Mole
Obtained over 10000 EXP	Design Art #63 Water Curtain
Bought over 100 items	Design Art #68 Tree Trunk Room
Collect all Figure Tokens	Design Art #69 Glass Passageway
Collected all Deployment Mechaniloids	Design Art #89 Giga City
Saved 50 times or more	Design Art #91 Save Process
Completed over 25 play hours	Design Art #92 Force Metals
Obtained over 50 Force Metal Recipes	Design Art #96 Force Metal Ore
Spent over 100000 Zenny	Design Art #99 Teleport Device
Collect all Posters	Design Art #24 Proto Crab Mech
Deployed over 50 times	Music File #50 Trajectory of Battle 2
Cleared Game	Video #56 Final Confrontation

ART GALLERY

怪盗レプリロイド "マリノ"

企業機密である新技術や新発明を
専門に狙うレプリロイド。

シグマウイルスを代表とする、現在の技術では
完治しない奇病に苦しむレプリロイドを救う為
新進の技術や発明品のデータを盗み出し、
無償で世に広めている。

背中や腿脛についているバーニアによる
細かな姿勢制御により、高速で、安定した
行動が取れる。

ハヨーン

マリノのサポートメカニロイド。

部下的な存在であるにも関わらず、
基本的に主人(マリノ)より態度が
でかくて口も悪い。

エンジェリックセラピー シナモン

胸元ハッチの中には特殊なフォースメタルが
内蔵されている。

背面図

背中や腿脛についているバーニアによる

手は肘から先をとりかえるロックマン式ですので、
バトルモーションシーケンサの出力時は肘から先の無い
状態で変換して下さい。

感情表現の一端として肩中の羽根(羽)の部分を動かせる
様にしてあります。

難しいとばかり、思っているとシグマ
って感じで次の段階の様に出れば良いな
と思います。

ステージ2 マーケット

ここに鳥が入ります

レイビットRX

耳に有るレーザー兵器で攻撃！！

両耳からレーザーを発射し、尻尾からはバルカンを撃ちます。またたまに降り出す飛び蹴りも強烈です。

ガウディール博士が改造力スタマイズ化した
門番用雷ビット。耳がバルカン兵器に改造
された模様

必殺の飛び蹴りで大ダメージ
を与える。

尻尾からバルカン掃射

門番用特殊メカニロイド **ダークビットGD**

今回制作して最もモデルはマント無しイブシロンです。

初登場時は目をバックにマント(?)
を羽織った状態で登場します。

他のキャラは主にベタ表現で作成
して描きましたが、イブシロンの
ボディは、線(真マッシュで線に)
グラデーションを使っています。

所々外装が無くなり出して有るかのような
表現をお見せします

この部分のパーツは、マント無し
状態では付いていません

最終バトルでその姿を表します。

最終バトルまで終始この姿で登場します。

外装の無い顔や、引き千切られた青中のコード線など
テクスチャーを多い目に依って表現して下さい。

ビームマフラー

この潜入用のアーマーの特徴として
レーザーを無効化する特殊な
ビームマフラーを内蔵しています。

背中の発光体は、効果で
ビルボードを置いてもらうか
テクスチャーとして動でも
動くしない方式をとるがして
背中が動いても目立つようにする。

肘、膝、後頭部などの発光体も
同じく光らせる。

顔の裏はもう少し中で
光っている様にしたいほうが
良いかも知れない。

マフラーも効果で表現し
出現する状況を限定する。

T E N T H A N N I V E R S A R Y

BradyGAMES published its first strategy guide in November of 1993, and every year since then, we've made great efforts to give you the best guides possible. Now celebrating our 10th anniversary, we'd like to take this opportunity to say a few things and extend a special invitation to you—our readers.

First of all, THANK YOU! Whether you're a long-time customer, or this is your first BradyGAMES guide, we appreciate your support. We hope that our guides have enhanced your overall experience when playing games. These days, completing a game isn't just about how quickly you finish. It's about uncovering absolutely everything a game has to offer: side quests, mini-games, secret characters, and multiple endings just to name a few. That's what the **TAKE YOUR GAME FURTHER®** banner at the top of our guides is all about.

Many games deserve more than just a standard strategy guide, and we recognize that. Our guides are produced with the highest quality standards and are tailored specifically for the games they cover. With the introduction of our Signature Series and Limited Edition guides, we raised the bar even higher.

Now for the "invitation" part. Although we constantly challenge ourselves to improve our guides, we'd like your help too. You're formally invited to tell us what you think about our guides. Like something we do? Let us know. Think something we've done is totally lame? Please let us know. We want your feedback no matter if it's good, bad, or just plain ugly. You can write or e-mail us at the addresses below, and we *will* read what you send. Your opinions are important to us, and may influence the direction for our guides in the future.

Write to:

BradyGAMES

800 E. 96th Street, 3rd Floor

Indianapolis, IN 46240

Send e-mail to:

feedback@bradygames.com

For now, we hope you enjoy this guide. Thanks again for choosing BradyGAMES.

CRUSH THE MAVERICKS!

Take command of X and his Maverick Hunter friends to combat the rebellion and bring justice to Giga City, and the world. Use our expert strategy and tips to bring Epsilon and the rebellion to their knees in Mega Man X's first RPG adventure.

- Strategies for Every Boss Battle!
- Detailed Walkthrough with Item Locations!

SHADOW

Shadow's HP has been depleted, leaving you with a single shot. Use the **Shot** to hit him. And now it's time for round two, with Zero in the attack! Though it's tough, you can win if you're not too careless. When he's down, he'll be right back on his feet. When he's down, he'll be right back on his feet. When he's down, he'll be right back on his feet.

Head south and grab the **Red Figure Token**, then talk to the **Yellow Pickaxe**. See him? He's a **Yellow Pickaxe**. Head south and grab the **Red Figure Token**, then talk to the **Yellow Pickaxe**. See him? He's a **Yellow Pickaxe**.

Set out the red Mechanical in the Northwest Division, and make the Pickaxe for the **Yellow Pickaxe**. This also sets you the **Electric Components** you need, but the other Mechanicals are also malfunctioning. You're a nice guy, so help them out! Grab the **Figure Token** behind the red Mechanical, then take the north door for the **Acce of Hearts**, and a deactivated **Dugger** for the **Deployment Center**.

Find in your **Yellow Pickaxe** for the **Yellow Mechanical's Blue Pickaxe**. Grab the **1000 Zeny** in the door to the south, then return to the Main Tunnel. Give the **Yellow Pickaxe** the **Components** to fix the **Yellow Pickaxe**, and then return to the **Blue Mechanical** in the **West Main Tunnel**. Yep, he needs the **Blue Pickaxe**, and gives you the **Green Pickaxe**.

INCENTAS

Incintas is a **Red Pickaxe**. Head south and grab the **Red Figure Token**, then talk to the **Yellow Pickaxe**. See him? He's a **Yellow Pickaxe**. Head south and grab the **Red Figure Token**, then talk to the **Yellow Pickaxe**. See him? He's a **Yellow Pickaxe**.

Head south and grab the **Red Figure Token**, then talk to the **Yellow Pickaxe**. See him? He's a **Yellow Pickaxe**. Head south and grab the **Red Figure Token**, then talk to the **Yellow Pickaxe**. See him? He's a **Yellow Pickaxe**.

Head south and grab the **Red Figure Token**, then talk to the **Yellow Pickaxe**. See him? He's a **Yellow Pickaxe**. Head south and grab the **Red Figure Token**, then talk to the **Yellow Pickaxe**. See him? He's a **Yellow Pickaxe**.
